

# Monday.Com AI Hackathon

QGib

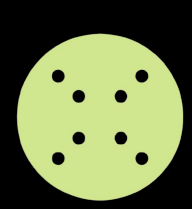

Monday.Com

QRoulette

Hi! I am Or

I am a Unity Developer, expert in Extended Reality, published six AR Games at the Store, and recently got into JavaScript, Chrome Extensions and well... Monday.Com Marketplace AI App ☺

Be the first one to update about progress, mention someone or upload files to share with your team members

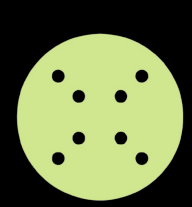

# We found a solution! Introducing QGib

The screenshot shows a Monday.com workspace interface. On the left, there is a sidebar with navigation options: Home, My work, Main workspace (selected), a search bar, and a list of documents including 'Welcome to your develop...', 'Test', and 'New Doc'. The main workspace area displays a 'New Item' card. The card has a title 'New Item' and tabs for 'Updates', 'Files', and 'Activity Log'. The 'Updates' tab is active, showing a rich text editor with a toolbar and a text box containing Hebrew text: "ישא שרק 'ק OMG! שרק אטפומע ש רקשררט רממע אקסא שמג 'ק כרעפא אם בישמעק איק לקטבשרג עסומע אם גם? אטפק שעשומ? מסססם". Below the text box, there is a 'Draft Saved' indicator and an 'Update' button. At the bottom of the card, there are icons for 'Add files', 'GIF', 'Emoji', 'Mention', and 'AI Assistant'. Below the card, there is a large illustration of two hands holding a tablet displaying a chat interface. Below the illustration, the text reads: "No updates yet for this item" and "Be the first one to update about progress, mention someone or upload files to share with your team members".

QGib is open source!

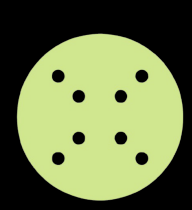

- \* Support for additional languages coming!
- \* More cool features by the community
- \* Benefits from wisdom of the crowd
- \* Genuine and trustworthy!

QGib supports conversion between English, Arabic and Hebrew

QGib was designed to allowing you to convert your text between all supported languages seamlessly, using sophisticated data structures and optimized searching algorithms for them!

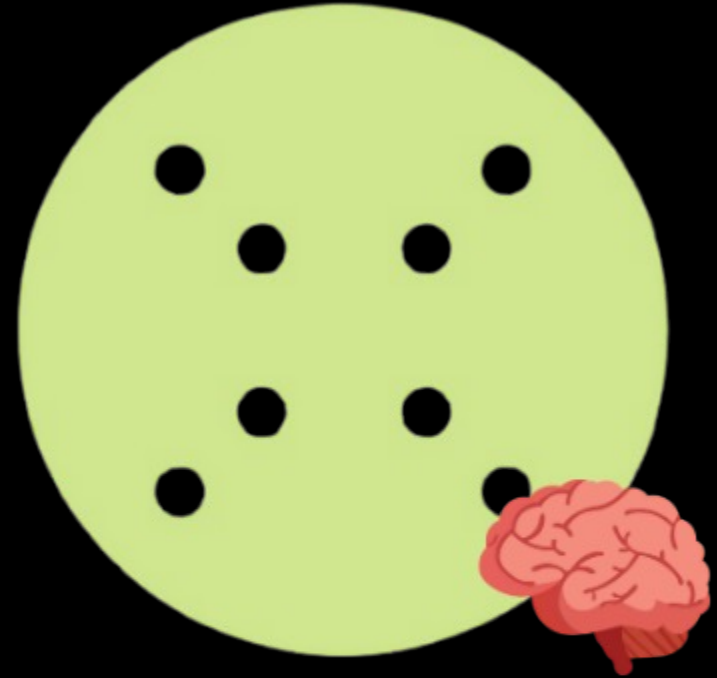

Even better, adding languages to QGib, will be easy, thanks to a modular design of the code!

One more thing...
