Resume Debugger

Transforming the way we improve resumes

Introduction

- Greetings from Team YJIJ
- Brief introduction of the "Resume Debugger"

Identifying the Problem

- Resumes are crucial but challenging
- Resume Debugger simplifies the process with AI
- Streamlining workflow and enhancing AI responses

Behind the Scenes

- Developed with: React, Node, MongoDB
- Uses: Document AI and Google Cloud's Vertex AI
- Provides: Real-time, personalized feedback

Demonstration

- Upload your resume in PDF
- AI analyzes and scores the resume
- Detailed suggestions for improvement
- View and manage analysis history

The Future of Resume Debugger

- As AI evolves, so will Resume Debugger
- More than just an AI resume review tool
- Possible integrations with education programs and career centers

Thank You!

- We appreciate your attention
- We welcome your feedback and questions
