

Judgy

Your trusted ally for hackathon judging

Hackathon Judging : The current picture

High participant volume

Judgy

Manual evaluations under tight deadlines

Google Vertex AI hackathon 2023

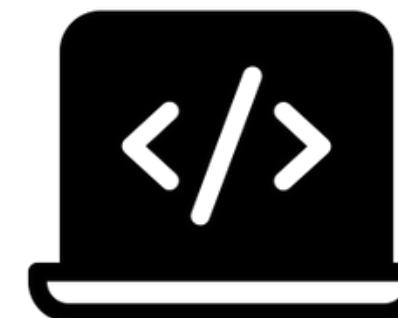

This highlights the problems for the hackthon judges

Hindrance in
indentifying high
potential ideas

Limited market
research data and
knowledge

Code
comprehension
difficulties

So most of the hackathon judges just....

There exist a need for a solution that can help judges evaluate and understand hackathon ideas more efficiently

Introducing...

Judgy

Your trusted ally for hackathon judging

Judgy aims to streamline the hackathon judging process by

Providing judges with
valuable insights for every
project idea

Assisting them to gain
deeper understanding of
the hackathon ideas

Feature #1

Market Research Agent

Unveils every project potential through comprehensive market research, competitor analysis, and audience targeting. All powered by AI.

Judgy

Google Vertex AI hackathon 2023

Feature #2

Code Reviewer Agent

Evaluates code for completeness, quality, and adherence to mandatory tools. Gives insights into the codebase without having to run it.

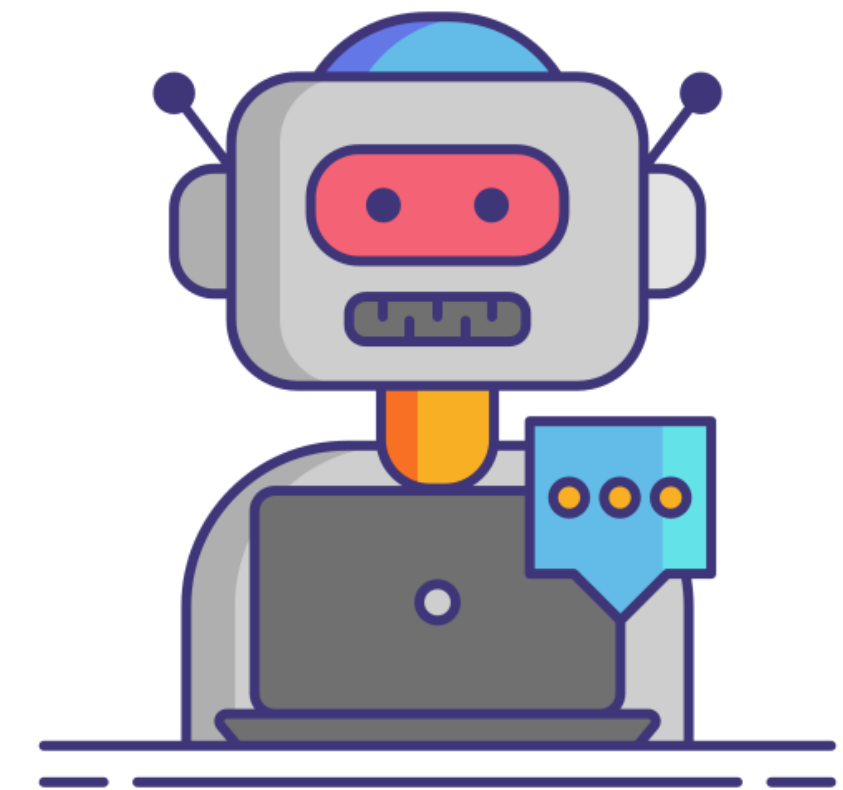

Feature #3

Chat with Judgy

A comprehensive chatbot that is capable to understand each of the project idea and its codebase.

Enables judges discuss, learn and get a more complete understanding of every idea

Judgy

Google Vertex AI hackathon 2023

Feature #4

Semantic Search

AI powered search that helps judges search for hackathons submissions by context of the query instead of simple keyword searching

This will enable judges look for similar projects and search for specifics in a submission like tech stack and implementation
