

# PROMPT PALADINS: TACO

---

Terms And Conditions Oracle

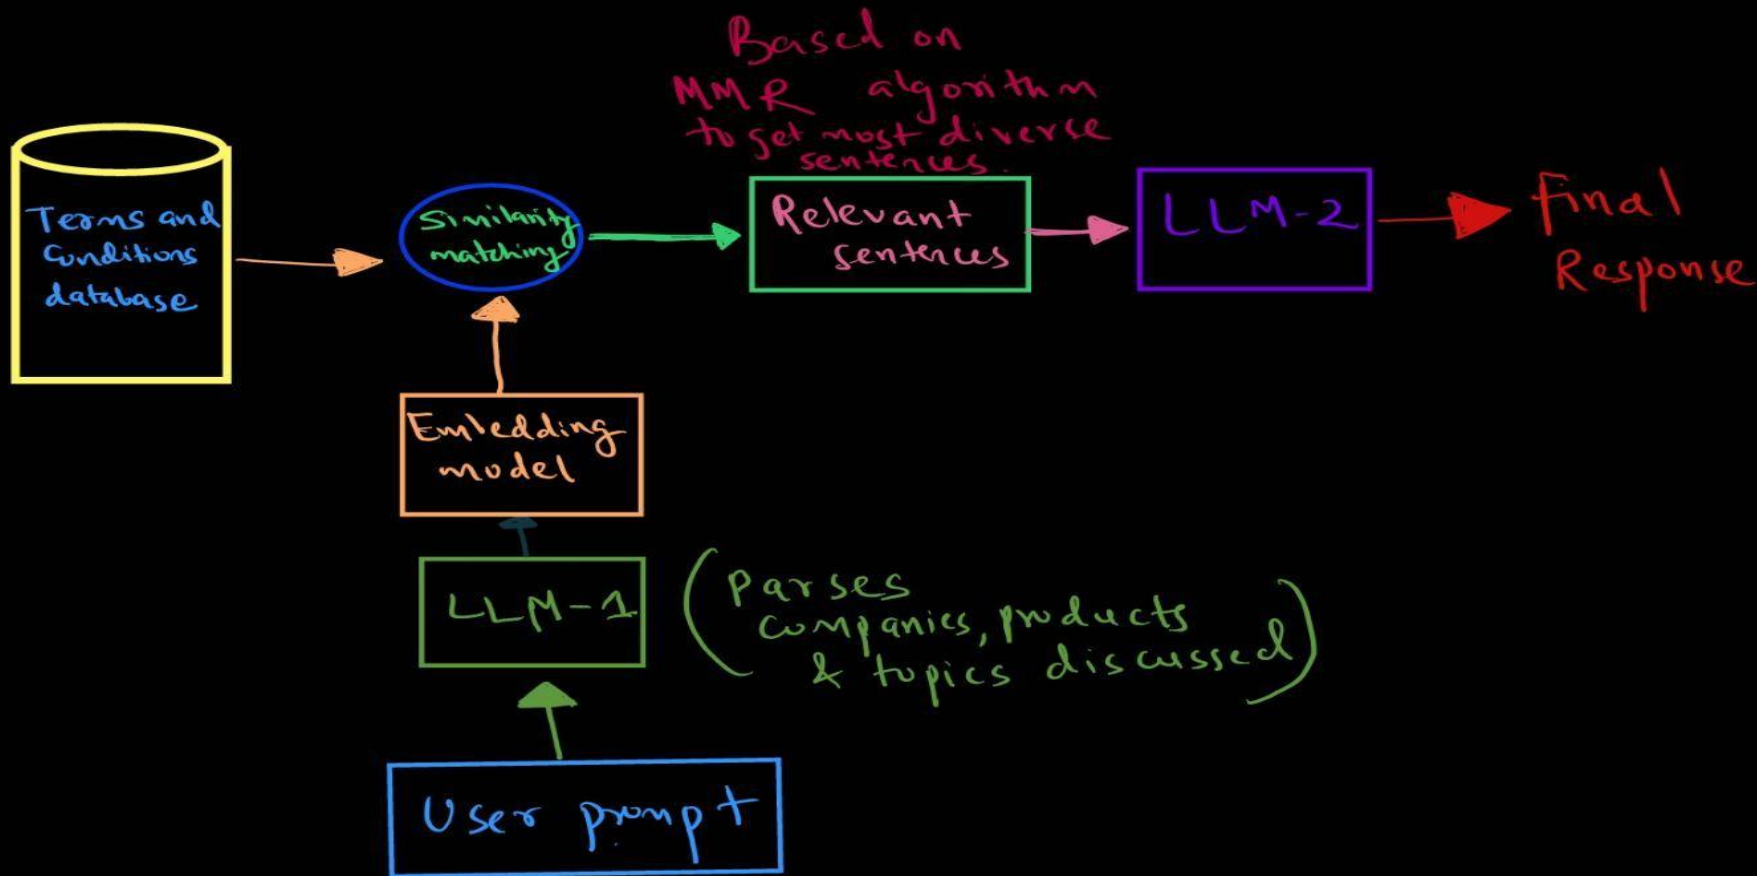

# WHAT IS TACO?

- TACO stands for Terms And Conditions Oracle
- Powered by Google Palm Model, TACO is a cutting-edge app
- It is designed to help users navigate and comprehend complex terms and conditions

## Key Features of TACO

- **Comprehensive Coverage:** Provides insights into the terms and conditions of top companies
- **Precise Answers:** Utilizes large language models to deliver accurate information
- **Empowers Users:** Allows individuals to make informed decisions and protect their rights

# SCHEMATIC DIAGRAMS AND DESIGN DECISIONS

# FUTURE SCOPE

## Extension Development:

- Create a browser extension for the Taco app.
- Enable reading and understanding of terms and conditions for any company.
- Provide on-the-fly analysis and information retrieval.
- Ensure comprehensive coverage beyond the existing dataset.

# FUTURE SCOPE

## **Expansion to Other Contract Types:**

- Extend the capabilities of Taco to cover other contract types.
- Incorporate leasing contracts, rental agreements, and more.
- Enable users to analyze and understand various legal agreements.
- Offer comprehensive contract analysis across different industries.

# CONCLUSION

- Taco addresses the need for clarity and understanding of complex terms and conditions.
- The app empowers users to make informed decisions and protect their rights in the digital age.
- Taco's future scope includes a browser extension for real-time analysis and expansion to cover diverse contract types like leasing agreements.
