

LabLab.ai Google Cloud Vertex AI Hackathon '23

Google Vertex AI API Chain

July 10, 2023

Opportunity Gap

Generative AI is fastly evolving

From **SMBs to large tech** companies are excited to try out **Generative AI in their own products**

How might they **leverage existing API documentation** to build AI capabilities on their products?

Solution

A Postman like Developer/Utility Tool 

that will help the **Development and Product team** explore how their APIs behave with natural language input queries and then fine-tune the API documentation, prompts & model to make it work better

Secure

Cost Efficient

Easier to maintain

DEMO
