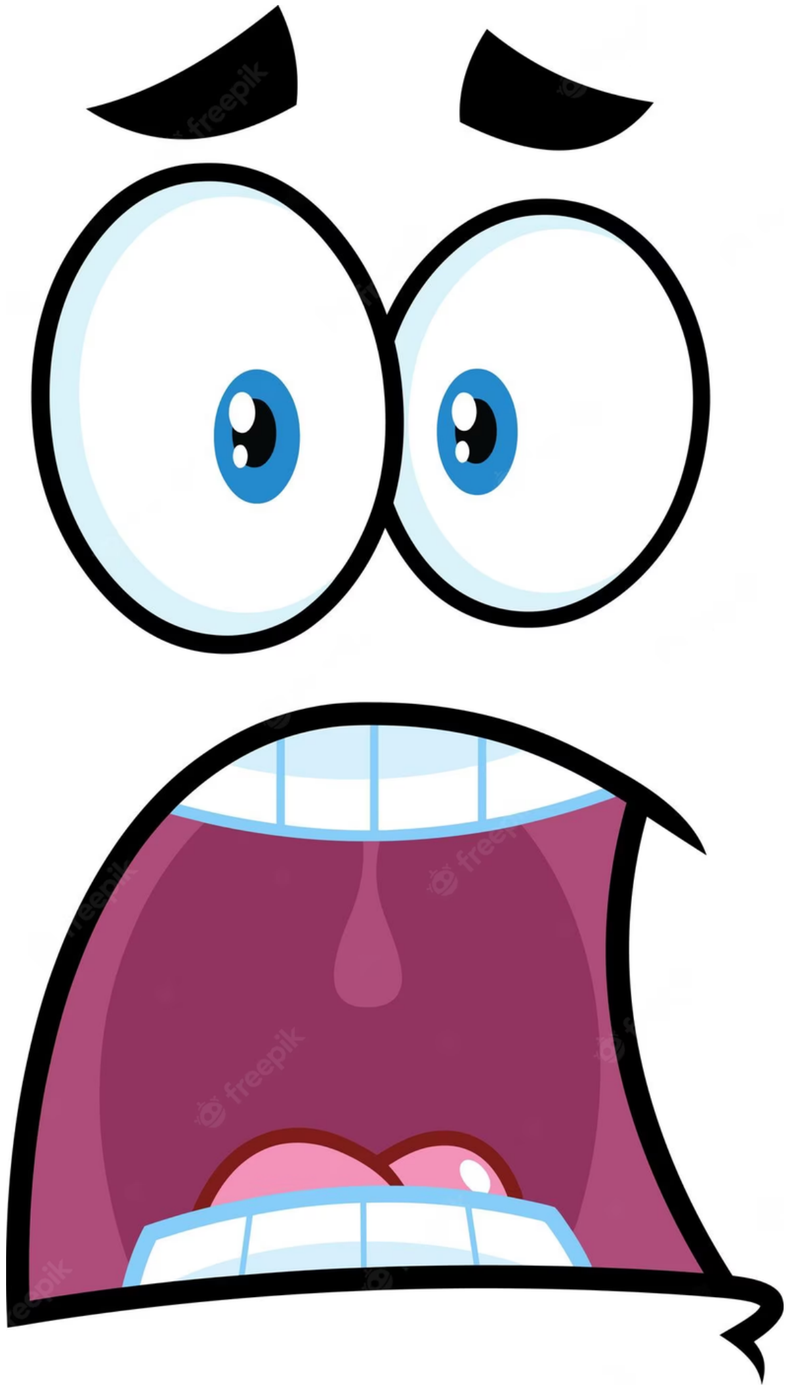
GODS EYE

GOOGLE CLOUD VERTEX AI HACKATHON

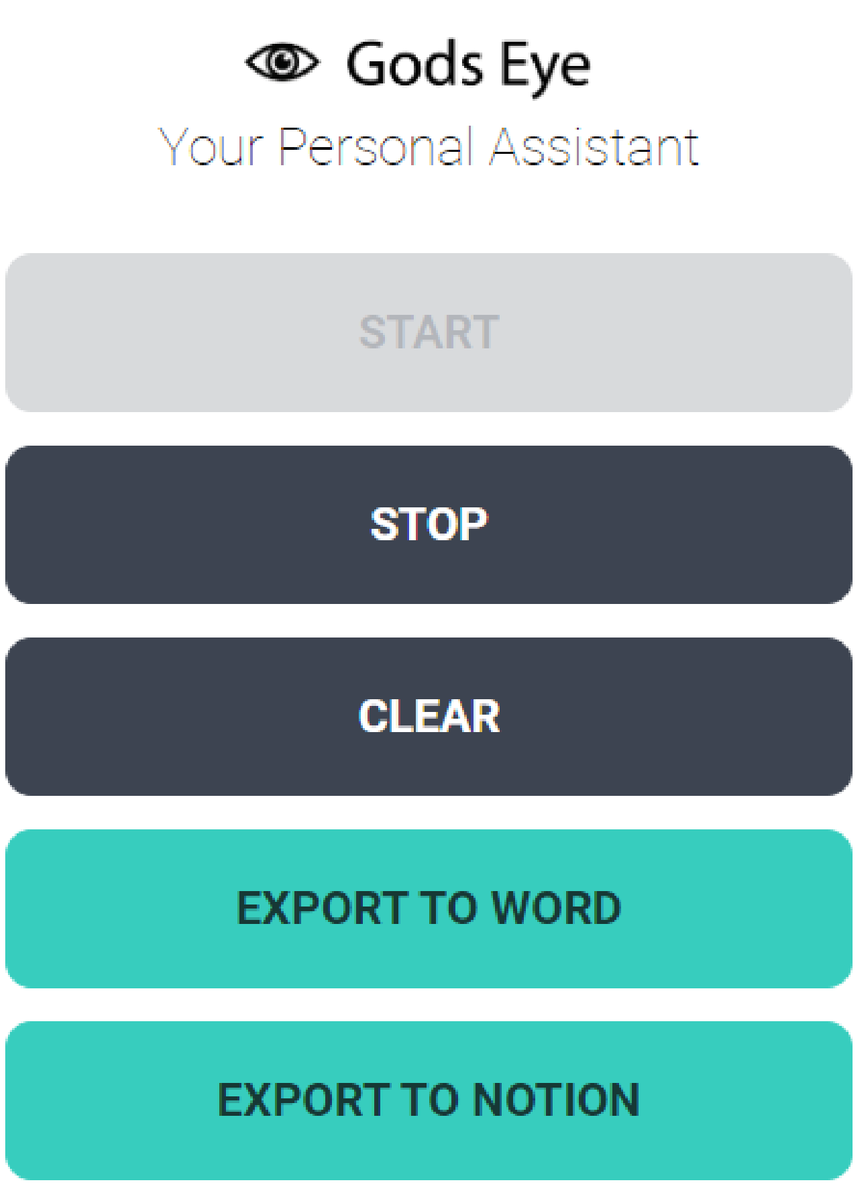
Removing the hassle of meeting minutes

IMAGINE YOU ARE HOLDING AN ONLINE MEETING



But you forgot about meeting minutes!

INTRODUCING GODS EYE



How We Help

1

DOES MEETING MINUTES FOR YOU!

Starts listening and curating a precise meeting minute document for you at one press of a button!

2

PROVIDES PRECISE MEETING MINUTES

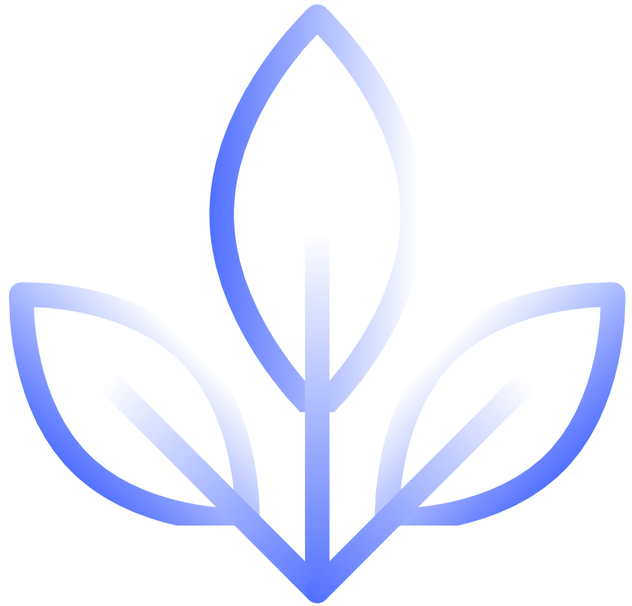
Answers specific questions such as "what are the deadlines" in order to provide the relevant and important details

3

KEEPS CONFIDENTIALITY OF YOUR MEETINGS

Wipe the transcript of your meeting from our database at one press of a button

THE PROCESS



Why we came up with this idea

1. **The idea of meeting minutes often gets forgotten**

- Someone remembers right before the meeting is about to start
- Rush to assign someone to take down meeting minutes
- Guy has to rush out a notion page or something

2. **Meeting minutes are very important**

- Streamline the process of taking meeting minutes
- Removes the hassle of the whole process

SKILLS WE HAD TO LEARN

GOOGLE VERTEX API

This was our first time using Google Cloud's vertex API but it was really versatile and offers a wide range of models and was really easy to use!

TECH STACK

Frontend

- Chrome Extension
- Speech to text Implementation

Backend

- Backend server (Flask)
- Making API calls to Google Vertex API
- Notion API and google word API

BUSINESS POTENTIAL

Gods Eye is a really effective tool for startup and business owners and in general, anyone who host meetings often.

It is a very efficient way to take meeting minutes and we believe that it can be very valuable to companies since it can be integrated into their software e.g. Google Meet, Zoom etc

THANK YOU FOR LISTENING!
