

InvestNinja

AI-Powered Patent Analysis for Killer Portfolios!

Problem Statement

InvestNinjas tackles the problem of navigating extensive patent data to build optimal investment portfolios. By leveraging AI and Google technologies, we decode patents to identify valuable opportunities and disruptive trends. Our goal is to streamline the process, revolutionize investment strategies, and empower investors with actionable insights for profitable decision-making.

Conclusion

This Hackathon was a really great experience. We learned a lot about using Google Cloud Platform, OpenAI and integrations with GitHub and Streamlit. Further developments includes to integrate a credit and score system. By the moment we still solving some technical issues and we expect to finish soon with help of mentors and the team.
