

MedAgent

The AI tool for clinic
history

**How much time medics spend
when opening a patient clinic
history?**

Problem?

- **Everyday, medics are opening new clinic histories for patients all around the world.**
- **This is a slow process that is made by hand most of the times.**
- **Time consuming, less time to spend with the patient**

The background features three large, overlapping, organic shapes in shades of purple and blue. The top-left shape is a large, rounded form with a gradient from light blue to dark purple. The middle shape is a large, elongated, bean-like form with a similar gradient. The bottom-left shape is a smaller, rounded form, also with a gradient. The text is positioned on the right side of the image, set against a dark purple background.

**Leveraging AI
power to make a
more efficient
process**

Solution

AI Powered tool

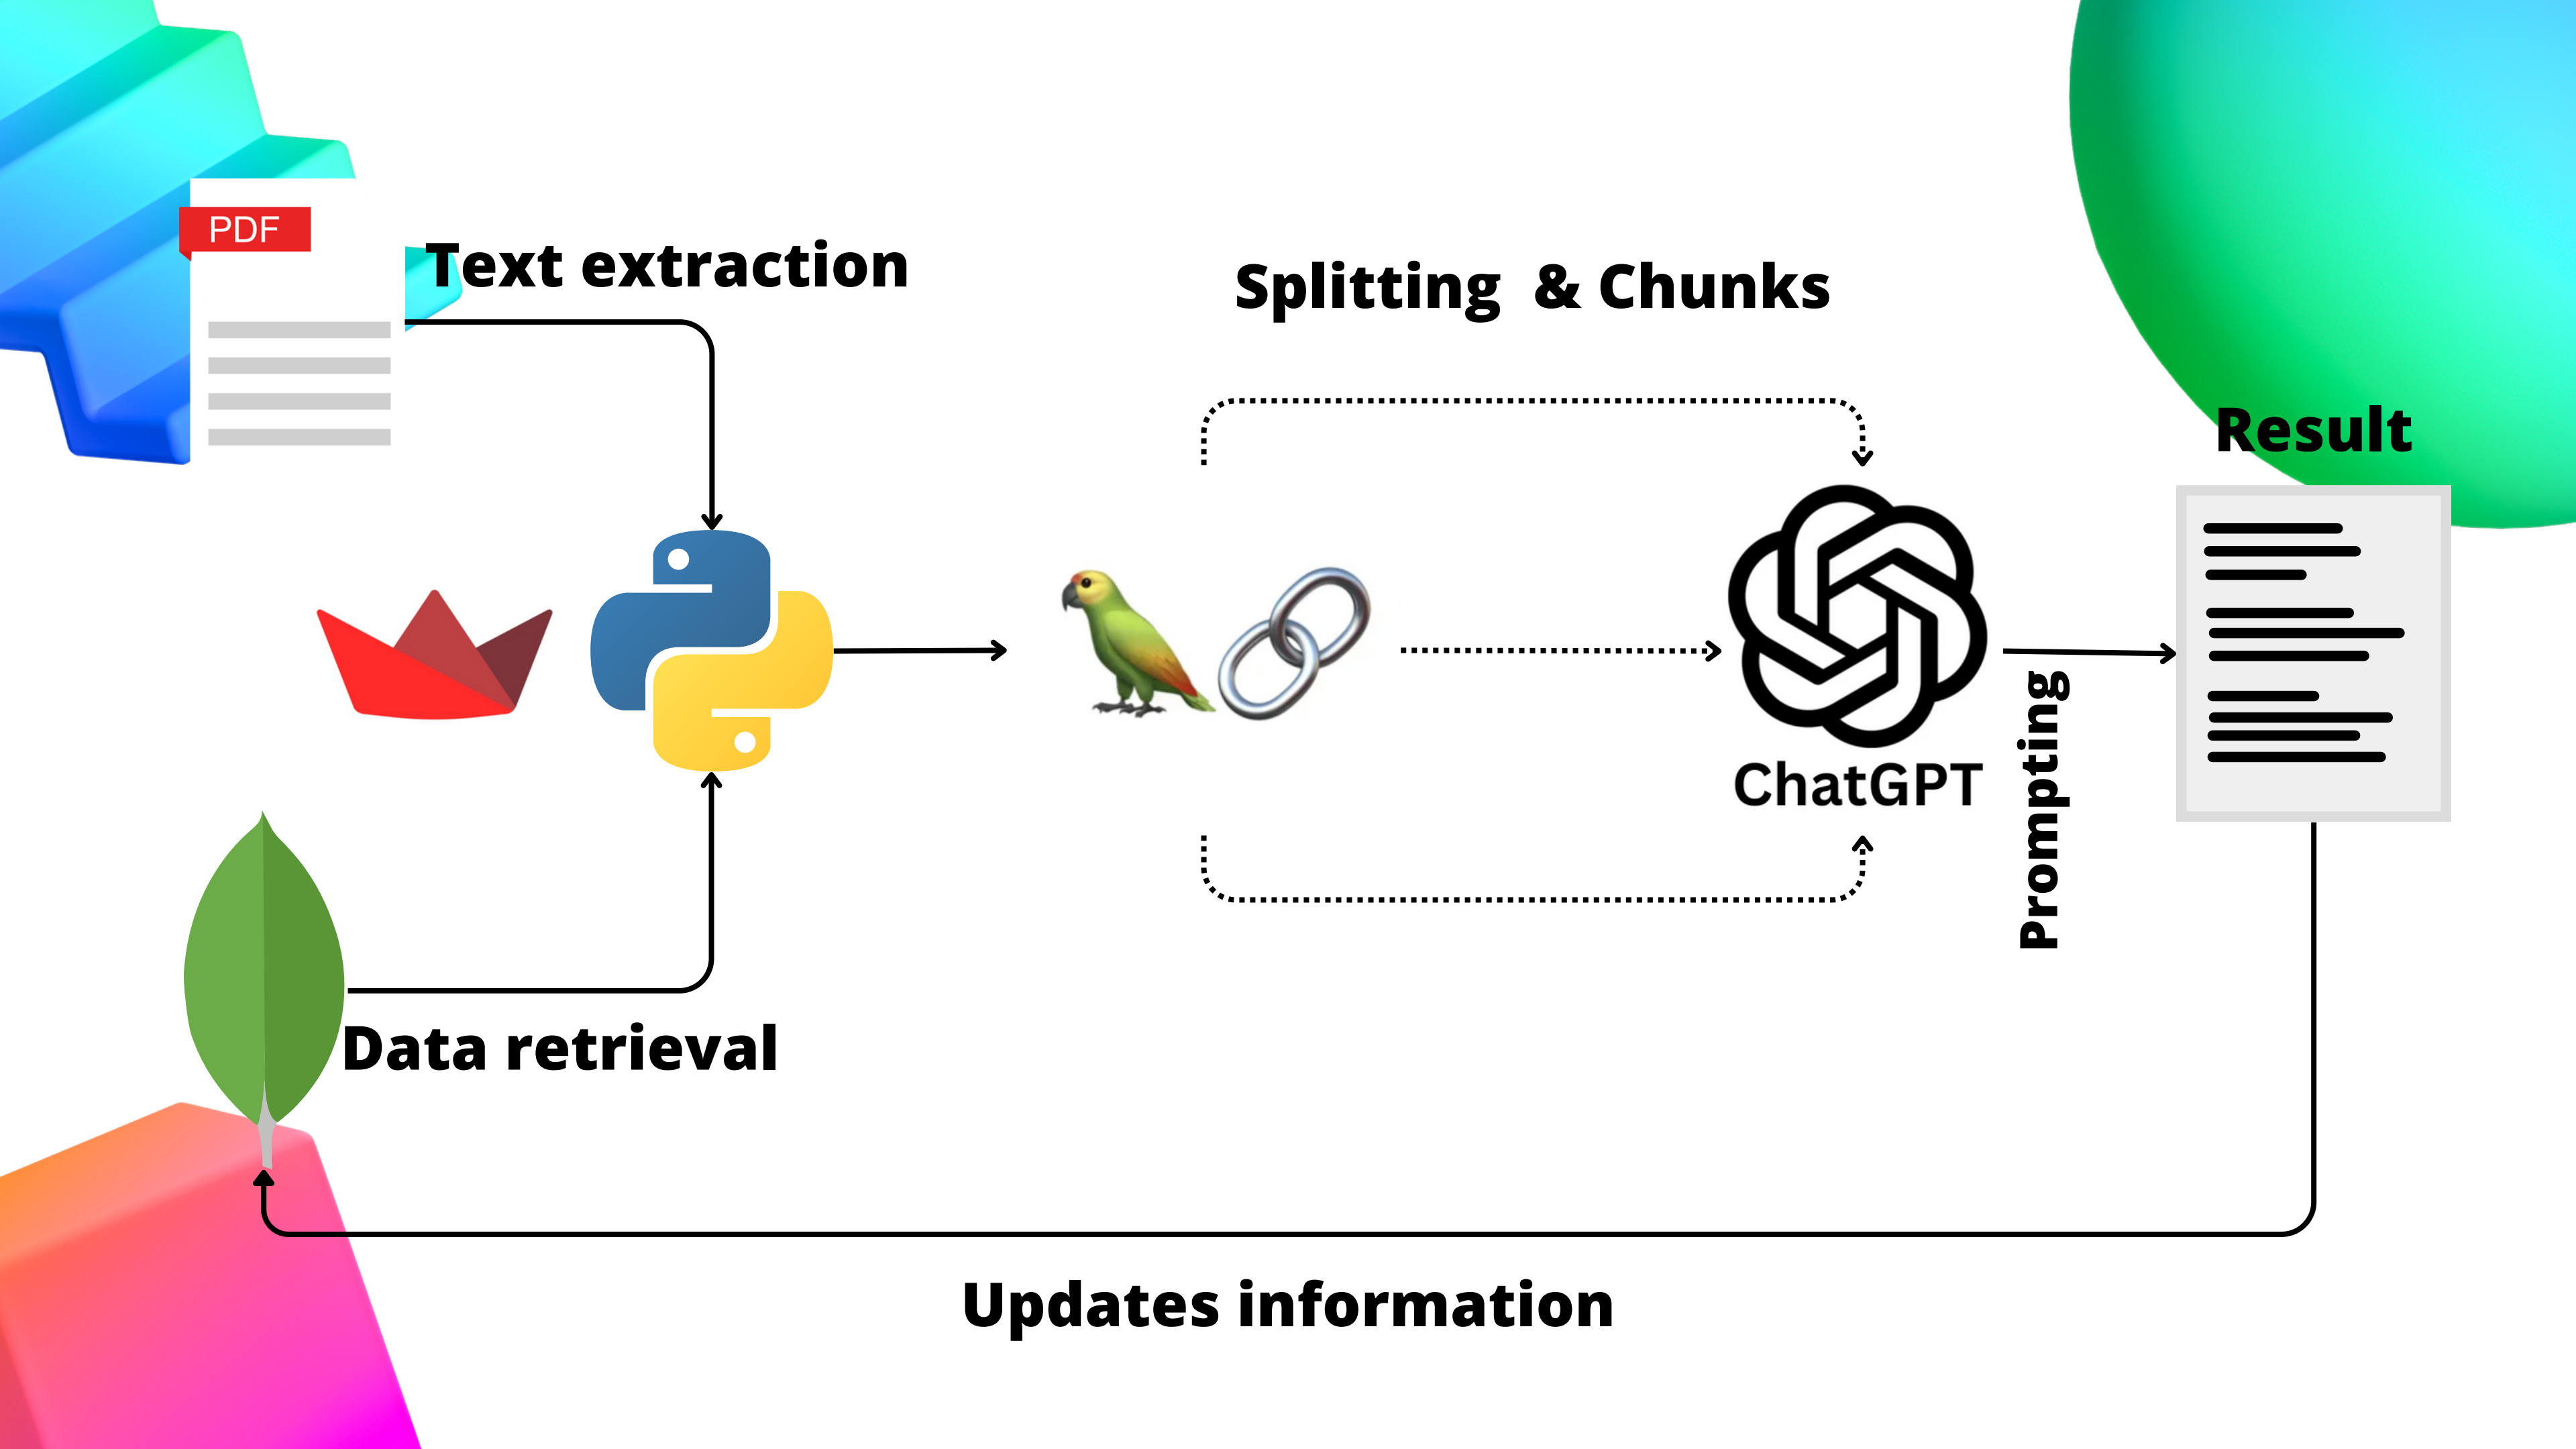

MedAgent is an AI powered web based application for data consulting.

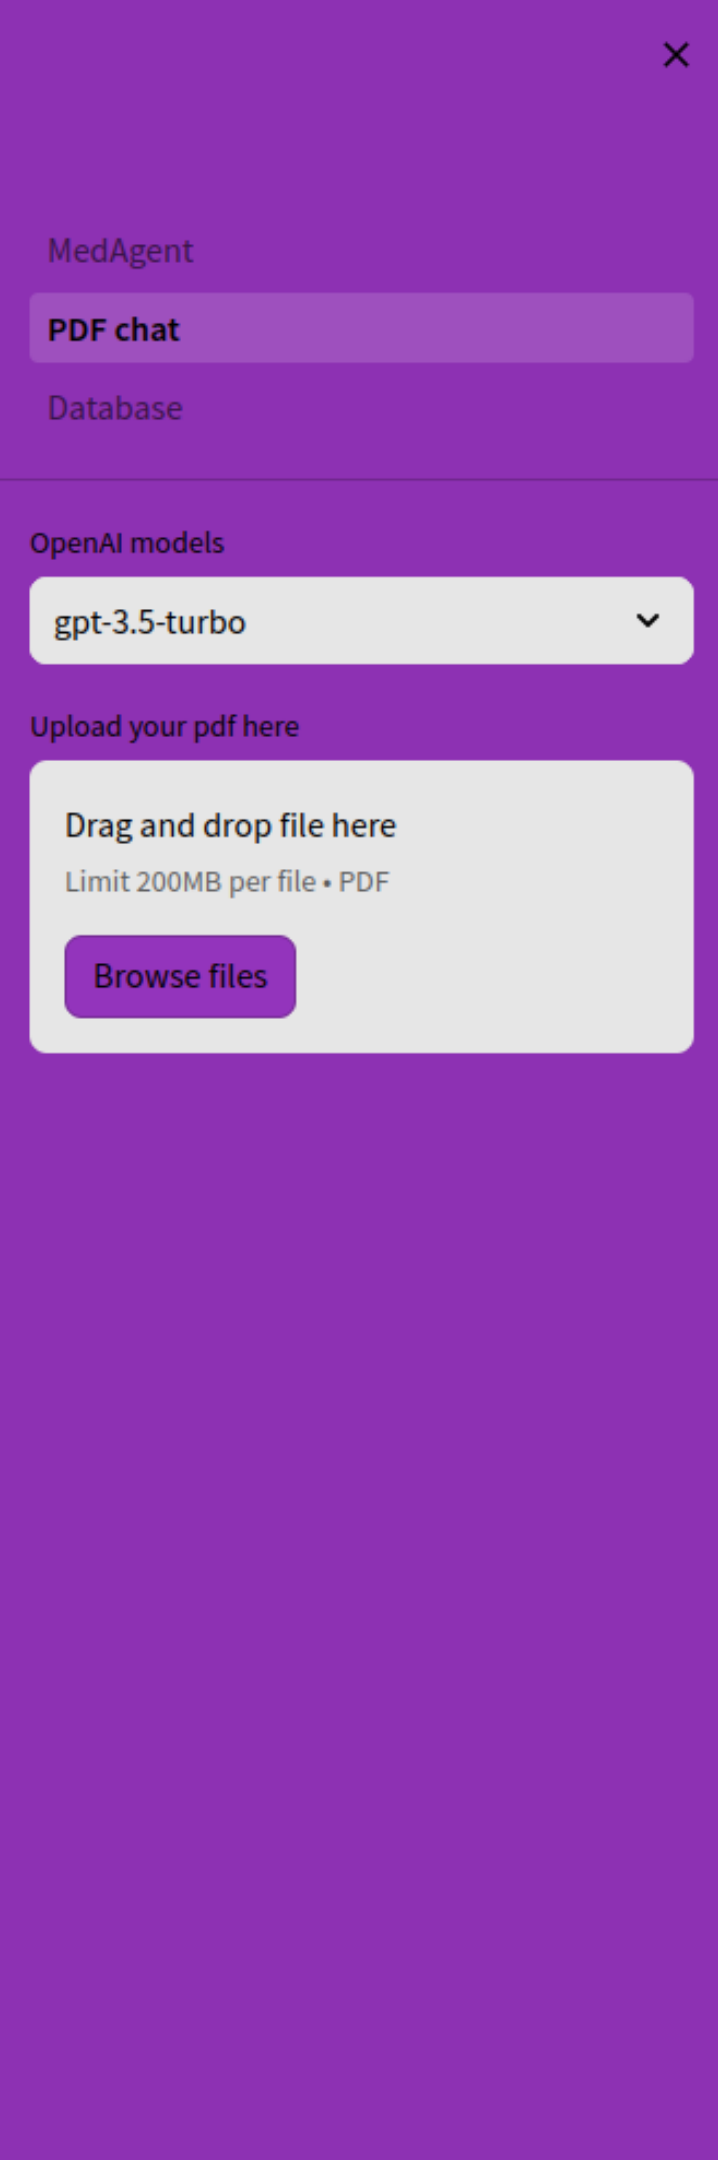

Why does it matters?

By simplifying the querying process and reducing the time a medic, the medic can spend more time analyzing the patient and interacting with him.

Innovation

There are few programs or applications that aim to integrate the updating, creation and consulting of the patient data.

Clinical Report Chat

Future Features:

- Implement voice assisted querying
- SQL Database support
- Implement voice recognition for automatic patient clinic history generation
- Patient side virtual medic assistant for clinic history consulting

Disclaimer:

Not all the planned functionalities are already implemented
