Virtual Assistant with Character Personalities

- Unique and Personalized: Engage with interactive character personalities for a personalized virtual assistant experience.

- Powered by ElevenLabs: Lifelike voices generated by ElevenLabs technology enhance the realism and immersion.

Your Companion in Conversation

- Talking with Favorite Character: Engage in interactive conversations with your favorite character, creating a personalized and enjoyable experience that brings joy and companionship.

- Emotional Well-being: Experience the positive impact on emotional well-being as our virtual assistant helps alleviate feelings of depression, sadness, and loneliness through engaging interactions and meaningful conversations.

Enhancing Productivity

- Helpful Utilities: Practical tools like downloading YouTube videos or audio enhance convenience and save time in daily tasks.

- Continuous Improvement: We value user feedback and continuously add useful tools based on their needs, enhancing the overall experience.

Let's put it to the test!

Future plans

1 **Voice generation speed**

Increase the speed of ElevenLabs voice generation process by obtaining Enterprise license. Plus, get an access to a lot of other useful features, that can improve the overall experience of the application.

Enterprise

For businesses that require a custom plan tailored to their needs.
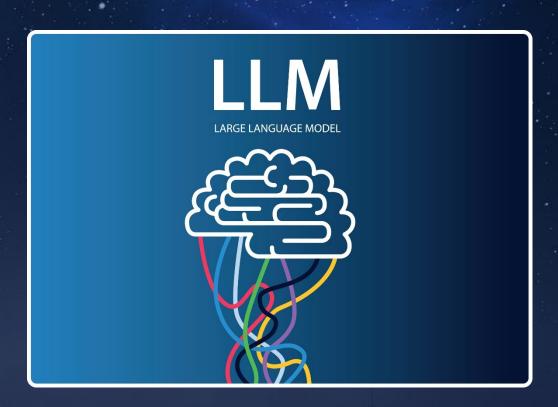

Let's talk

Contact Us

What's included

✓ Custom quotas for Speech Synthesis and VoiceLab

✓ Volume based discounts

✓ Professional voices

✓ Priority rendering queue

✓ Highest quality of speech

✓ Priority access to features

✓ Enterprise-level SLAs

✓ Dedicated Enterprise support

Future plans

New LLMs

Add new Large Language Models to improve text generation. Additionally, we can make our own LLMs for each character. It will be trained on all available information about the specific character (personality, background, world and more).

LLM
LARGE LANGUAGE MODEL

Future plans

③ **Design Improvements**

Current design look a bit outdated. We need to make a new design, that will respond to users interactions. Add new features like searching, sorting, hiding etc.

Future plans

Subscription Service

New business model: subscription. Since AI isn't free, we need to pay regularly to cover its price. The cost will be paid off mostly for the text and voice generations. Instead of putting every single API key in the settings, everything will be handled on our side!
