Gap Analysis

Identifying gaps between the current and desired situation, and how to fill those gaps

This exercise provides important input to change planning as well as a good contribution to teamwork. It will typically result in an analysis of 'things to do' which will be needed when crafting or validating the change plan, as well as providing a forum for participants to exchange their knowledge, ideas and perceptions.

Topic / Issue where change is needed

Change the above text to a short headline. Replace the text here with a more detailed description.

WHAT IS: The current situation / state

Type in the "Add term" section below and hit "enter" to briefly describe an aspect of the situation.

+ Managers are retiring

THE GAP TO FILL: Preliminary "to do's"

Type below and hit "enter" to briefly describe concrete steps to address the issue.

+ Create a pipeline of leadership candidates

WHAT SHOULD BE: The desired situation

Type below and hit "enter" to briefly describe the new state after a successful transition.

+ A strong and resilient organization

Your robotic research assistant

Enter a term (single word) below, then hit "enter" to see relevant definitions and examples

planning

Definitions

- the cognitive process of thinking about what you will do in the event of something happening
- an act of formulating a program for a definite course of action
- the act or process of drawing up plans or layouts for some project or enterprise

Examples

- his planning for retirement was hindered by several uncertainties
- the planning was more fun than the trip itself

Engage in focused intellectual activities, learning, and deep thinking.

Inspired by and related to:

- Memory Palaces
- Second brains
- Jerry's brain

Generative AI can quickly generate a large number of ideas, which can be helpful in ideation sessions where time is limited.

Generative AI can provide a fresh perspective and new ideas that may not have been considered by the participants.

Generative AI can help overcome biases and preconceptions that participants may have, leading to more diverse and innovative ideas.

Gene colla since a pla each

For example, it is a promising tool for creating content, generating ideas, and providing insights into user behavior. However, it is important to use it responsibly and not to rely on it for critical decisions. Additionally, generative AI can provide a unique perspective on product development by analyzing customer feedback and market trends.

Auto-generate ChatGPT requests based on the best prompt-engineering techniques and enriched with your own data, right from MIRO.
