Try Pitch

1. Problem

A satellite view of the Earth, showing the Americas in the center, surrounded by the Atlantic and Pacific Oceans. The image is slightly dimmed to allow text to be overlaid.

The Internet is predominately English,
comprising 60% of all content
But only 17% of the global population
speaks English

2. Current Solution

To dub video/audio content, to other languages ,you have to do the following

Step 1

Translate script

Step 2

Organize post production recording session with voice actors

Step 3

Hire editor to add new dubbed audio onto video

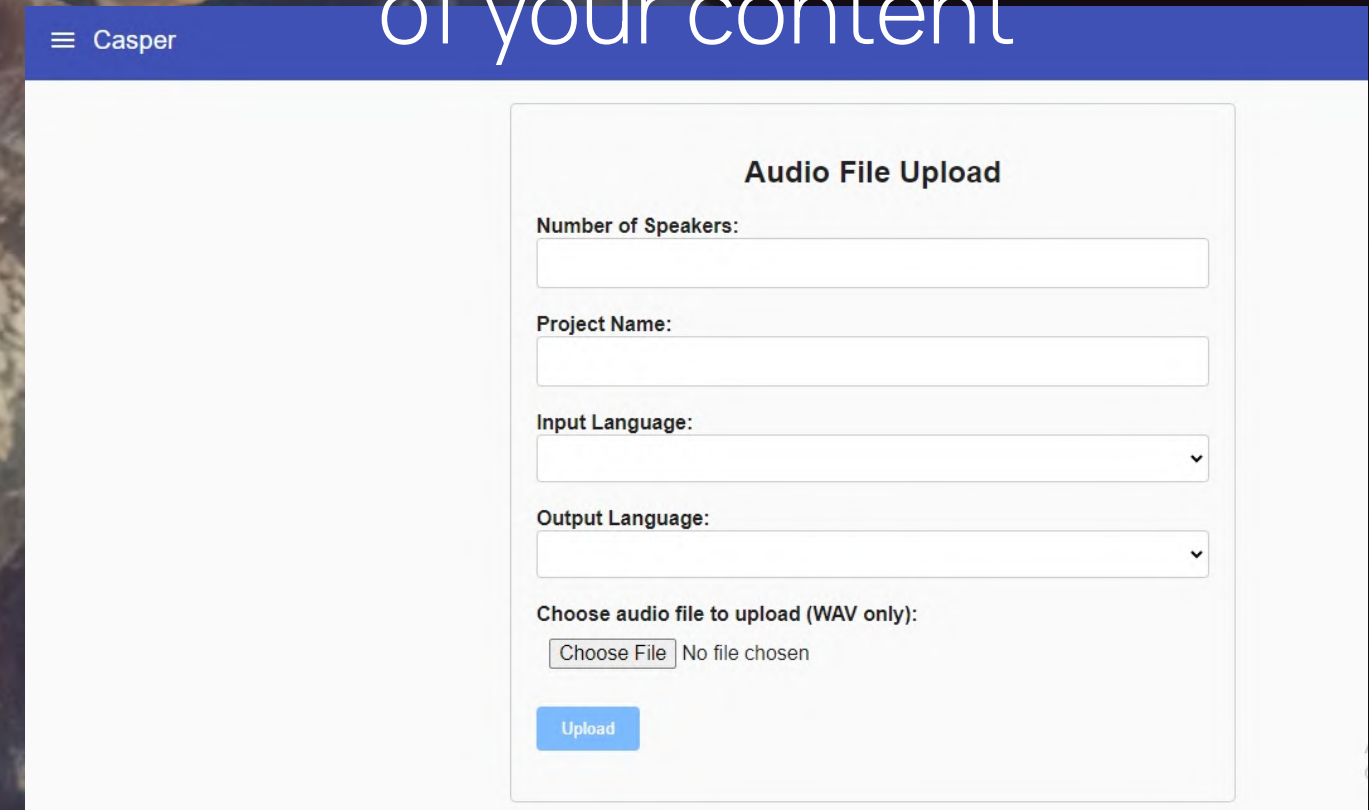

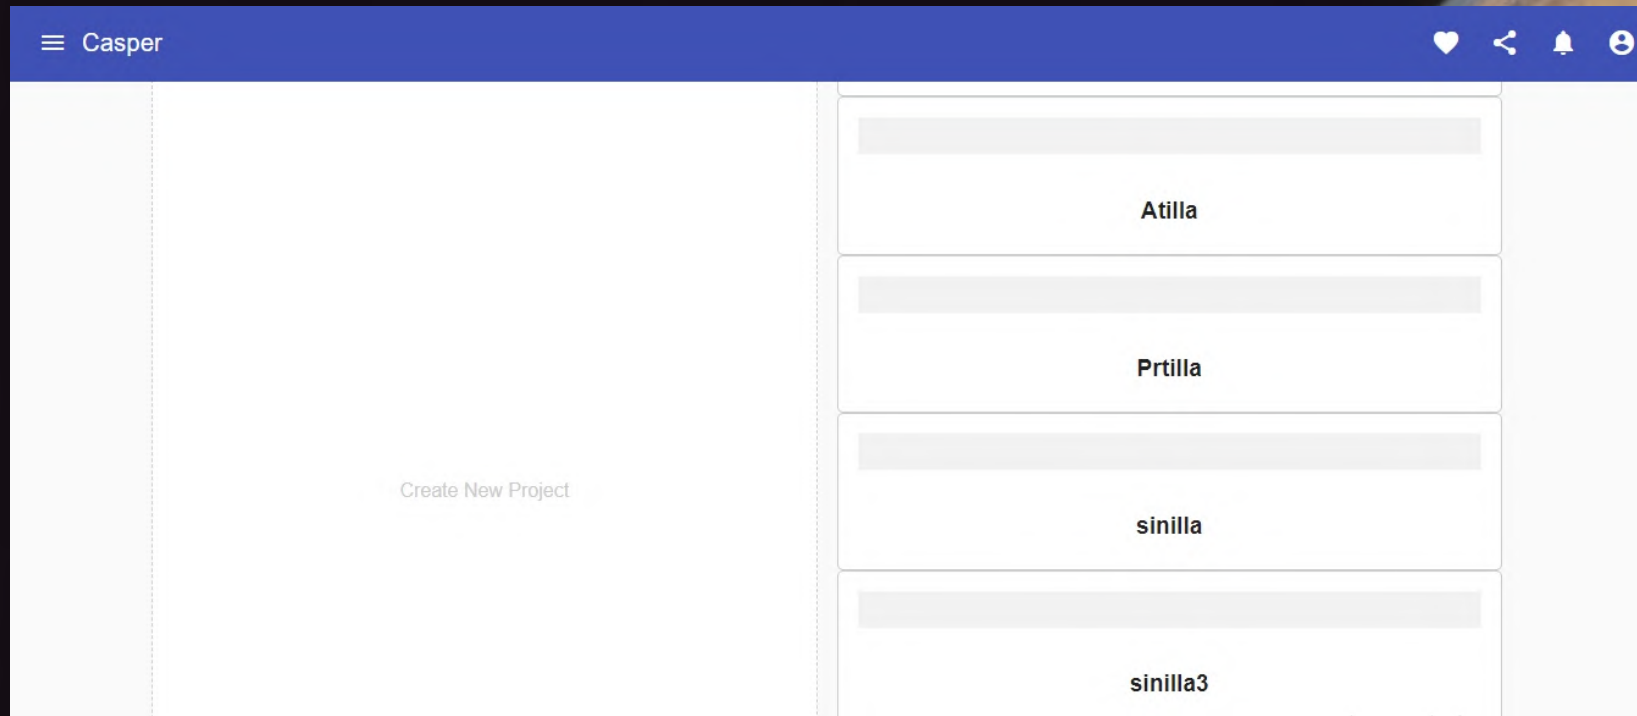

Repeat for each language you want to distribute your content
Translation can cost up to \$100 per voice actor for 10mins of work.

3. Our Solution

We autodub your content in a matter of minutes. No voice actors, no editors.
Video/Audio in, Video/Video out
Dub at scale to any Language of your choice cheaply

Step 1: Create a new dubbing project

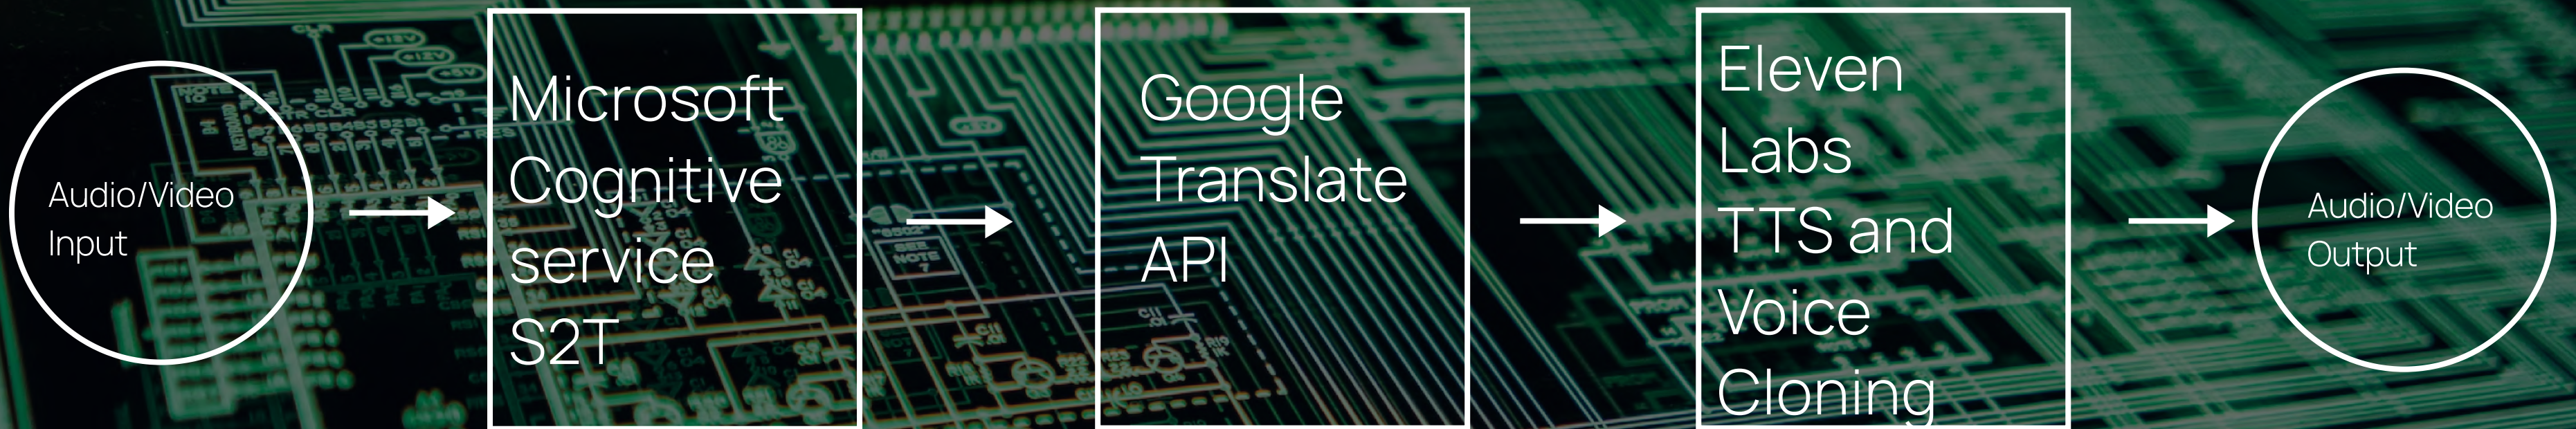

Step 2: Upload the audio component of your content

Step 3: After processing, you can listen to the original and translated utterance as well as correct translation errors and download the complete translated audio ready to be used in any video editing software as well as uploading to any platforms
