

practice and improve conversational speaking skills with the push of a button

Speak Easy

Improve your conversational skills with Habble.
Human communication with AI

meet vishal, an indian boy who wants to learn english to improve his job opportunities. He has learned english through books and watching english series. He can read and write english, but struggles to speak fluently due to lack of practice.

Similarly, Andrew, who learned spanish using duolingo, but is still not at conversational level due to absense of someone to practice speaking with.

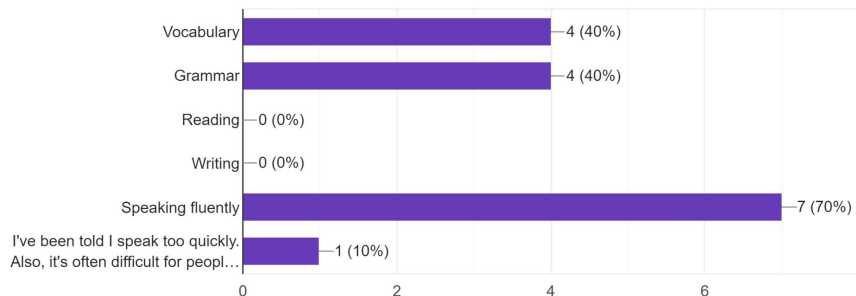

our survey revealed that speaking fluently is the biggest challenge for 70% of the language learners

Problem Statement

What part do you struggle most with? (select all that apply)

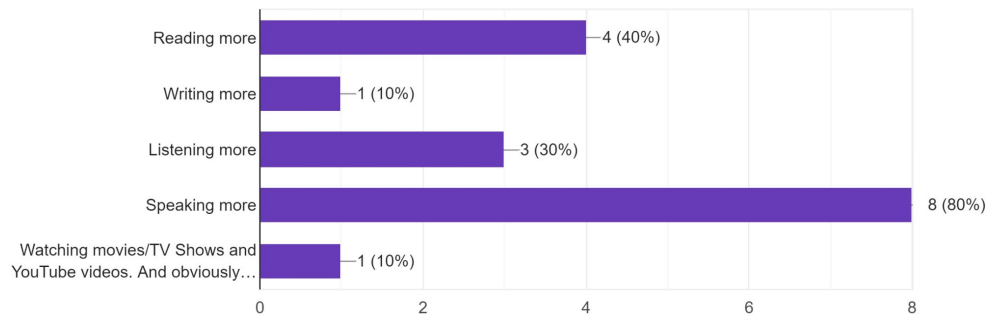

10 responses

- **Strongly value proper feedback**
- **Prefer to practice with software applications**

What do you think is the best way to improve your conversational skills? (select all that apply)

solution??

hiring a conversation mentor could solve their problems. But that is too expensive, and talking to a teacher everyday is boring

Therefore, I introduce to you, Habble, the one stop solution for anyone who wants to improve their language as well conversational skills. Habble is an AI powered tool that simulates human conversations and provides realtime feedback, to accelerate your learning experience. All without the fear of being judged.
