

# Vocaly

Your vocal ally for videos and presentations

# Our Background

Warsaw University  
of Technology

- Graduates and students of WUT
- Diverse backgrounds: DS, ML, WebDev, Business
- Members of Golem AI Association

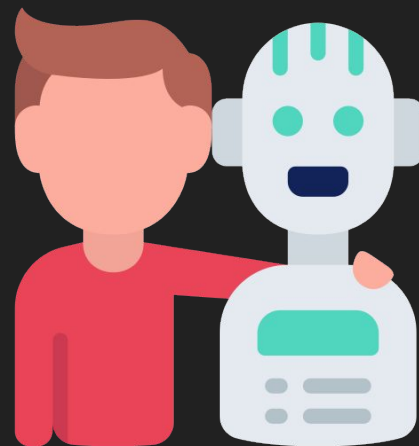

# Problem

Recording a good presentation is hard,  
sometimes even impossible,  
but what if it wasn't...

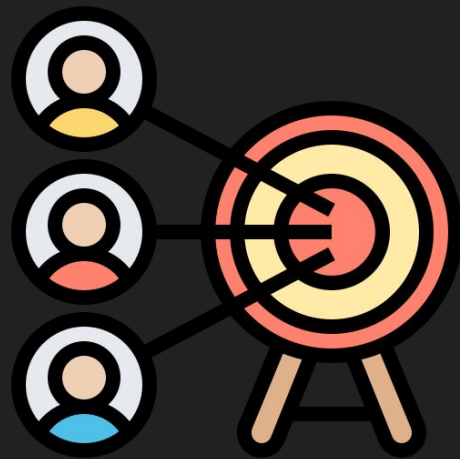

# Our solution

Application that automatically  
edits audio in your recordings,  
enhancing the audio and speech quality.

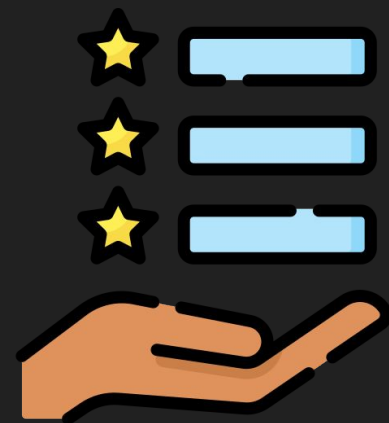

# Target audience

- People who struggle with speaking (speech impediment, Tourette syndrome)
- Non-native speakers (with bad pronunciation)
- People with bad recording setup

# Main features

- Improve the quality of speech and audio by re-generating the speech from scratch.
- Use one of the preset voices or a clean version of your own voice.
- Edit spoken text by editing the transcription.
- Add subtitles to the video.
- Translate subtitles and even audio to any language you want.

# Facts

- 500 million users of PowerPoint and 30 million presentations made daily.
- 15 million active creators on YouTube with 720k hours of video uploaded daily.
- Many people from those 2 groups would benefit from an application that enhances speech quality.
- Many other places where presentation might need to be recorded (e.g. lablab, conferences, office work).

# Competition

Many apps that do audio enhancing,  
but... only focusing on noise suppression  
**without any speech enhancing capabilities.**

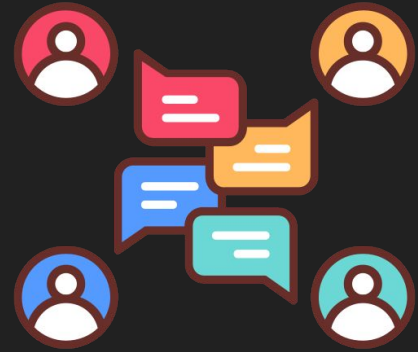

# Business Model

- Multiple subscription plans
- Pay as you go option
- Free access with limited functionalities

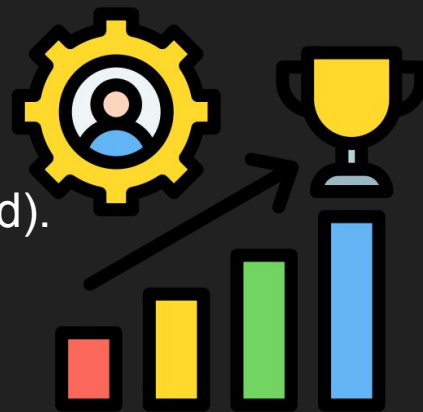

# Scaling

- Will naturally scale with elevenlabs to support new languages.

# Next steps

- Generating videos from presentation slides (end-to-end).
- Enhancing presentations.
- Real time audio and speech enhancement with extension.
- **Fasttrack for implementing users feedback.**

# Thanks for your attention!
