**Problem**

**Solution**

**How It Works?**

**Why Podsmash?**

## Problem

- With the abundance of podcasts available, it can be challenging to keep up with them all given the limited time available in our busy schedules.
- Often, podcasts can contain a significant amount of filler content that doesn't captivate your attention.
- With so many new podcasts being released every day, it can be quite challenging to keep track of all the latest ones.

## Solution

- Podsmash provides its users with an innovative AI assistant that actively listens to the podcasts that pique their interest.
- The software has the ability to capture notes and analyze them to extract valuable insights.
- After the process, Eleven Labs will employ advanced techniques to create a completely original podcast that caters specifically to your interests and preferred style.
- The podcast will cover relevant topics that matter to you, and it will be delivered in a manner that best resonates with your preferences.

## How It Works?

- User indicates podcasts they are interested in (e.g., Huberman, ALL IN)
- User also chooses their AI agent
- AI agent will transcribe and summarize the latest episodes the user from the podcast the is interested in
- Everyday, AI agent will combine the distilled summaries to create a tailored podcast
- Using Eleven Labs, this will be rendered
- The new tailored podcast will get added to the user's custom RSS feed automatically

## Why Podsmash?

- Podsmash is a user-friendly solution provides personalized audio content to match user preferences.
- Podsmash helps users save time and explore more interests.
- Try it out now: <https://podsmash.vercel.app/>
