COPRESENTER

a virtual co-host that makes presentations a breeze by using AI to read out your slides, freeing you from prep hassles and letting you focus on delivery.

Problem 💣

Presentations can be a tedious process involving long practice sessions and anxiety from public speaking.

This process often involves:

- Lots of practice
- Finding the right content
- Finding the right tone and pitch
- Anxieties & tummy butterflies

Solution 💡

Introducing Copresenter:

Your AI-powered, virtual co-presenter that delivers a lifelike co-hosting experience, making presentations more dynamic and interactive.
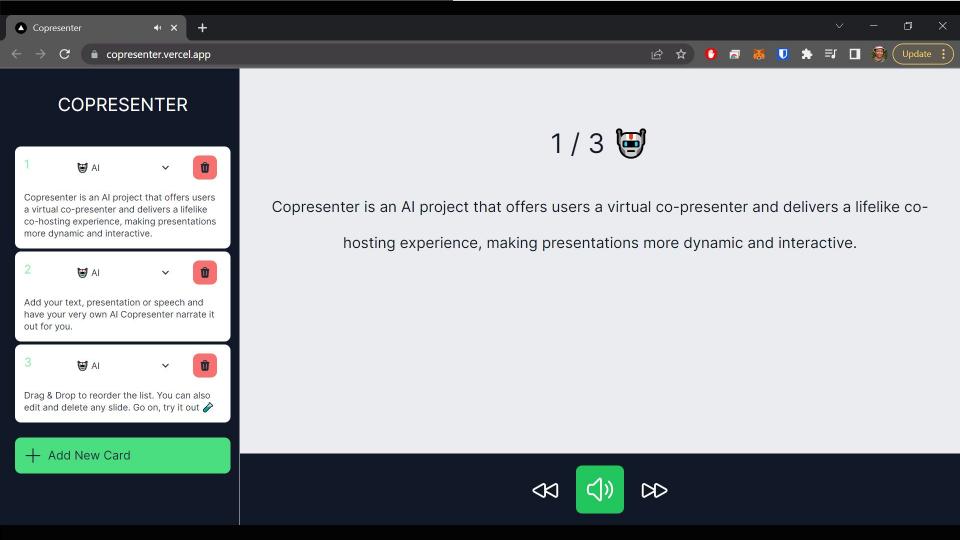

How it works ⚙️

With our service, simply input your text or speech into a new speaking card and our service automatically generates a lifelike narration using text-to-speech AI.

Save time, enhance your delivery, and focus on perfecting your presentation's content.

How it works ⚙️

Additionally, Copresenter offers customizable speaking cards displayed clearly on the UI for ease of reading, elevating your workflow and helping you make effortless presentations.

COPRESENTER

1 🤖 AI

Copresenter is an AI project that offers users a virtual co-presenter and delivers a lifelike co-hosting experience, making presentations more dynamic and interactive.

2 🤖 AI

Add your text, presentation or speech and have your very own AI Copresenter narrate it out for you.

3 🤖 AI

Drag & Drop to reorder the list. You can also edit and delete any slide. Go on, try it out 🖌️

➕ Add New Card

1 / 3 🤖

Copresenter is an AI project that offers users a virtual co-presenter and delivers a lifelike co-hosting experience, making presentations more dynamic and interactive.
