STORY CRAFT AI

A BED TIME STORY GENERATOR FOR BUSY PARENTS

MEET THE TEAM

Husnain Zahid
Backend Developer

Saad Atif
Frontend Developer

THE PROBLEM

- In today's fast-paced world, many parents find themselves juggling numerous responsibilities, including demanding jobs, household chores, and other commitments. As a result, spending quality time with their children becomes increasingly challenging, particularly during bedtime when storytelling has traditionally been a cherished bonding activity.

THE SOLUTION

- Our application "Story Craft AI" is designed to generate stories with a prompt in various languages and provides a bunch of voice options. This is made possible by the wonderful AI technologies such as OpenAI, LangChain and most importantly Eleven Labs.

MARKET SIZE AND REVENUE STREAM

- The primary audience for this application are busy parents and their children. We don't have any current plans to monetize this app but maybe in the future we may offer it as a subscription service.

NEXT STEPS

- Voice Cloning

- User Authentication System

- Story History

- Prompts History

THANK YOU!
