# Ai-Splain

Experience your website come alive

Team Hack to Live | Yajat | Dhanush | Vibha

## Current Scenario

**Bombarded with information making it difficult to grasp the app's purpose and features at one go**

Lengthy and Boring Web App Landing Pages

**Leading to user frustration and disengagement**

## The problem

- Web apps typically rely on static landing pages.
- Absence of interactive and personalized guidance.
- Bad user experience

# AISPLAIN

**AI voice technology to provide users  
with interactive and personalized  
walkthrough of websites**

# Features

## **Frontdesk for Your Landing Page**

Provide our assistant with your essential business knowledge, and it will engage your visitors in interactive conversation sessions.

## **Engaging audio guide**

AI-Splain allows you to add a guided voice that walks your visitors through your landing page. The assistant auto generates the script based on the content of your landing page.

## **Plug and Play**

Add the AI-Splain widget to any website with a single line of code and it works out of the box.

Backend

Frontend

# Business Model

- Subscription based service
- Targeting customers across various growth stages from startups all the way to enterprises.

# Future Scopes

- Going beyond just the landing page to entire website
- Expand to mobile apps
- Enhance use cases to include product demo, dynamic user journeys

**Thank you**
