Elevenlabs Al Hackathon

Live chat storyteller

The Twitch streamer's most community engaging mini-game, powered by Elevenlabs' technology

Problem

Twitch Stats

2,000,000+

Streamers

25,987

Twitch Channels with active extensions

10,000,000

Daily Active Users

image source

Problem

Live Streamers lack of content ideas

Content ideas are hard to figure out on daily basis

Lack of engagement between Streamer and Viewers

Viewers' Engagement with the streamer through Chat messages is not enough

One way- instead of Two way communication between streamer and viewers

Live chat storyteller

A **Mini-Game** which enables interactive experiences that connect **streamers** and **viewers** to play a storytelling game + Listen to it Live on Stream.

works on mobile and all web browsers out there!

visit app here ->

Business plan

Target customers

Content creators, Live Streamers and Influencers and their viewers

Pricing

Twitch extension bits cut 80% Streamer 20% Developer.

freemium Model (Limited for free)

Revenue

Estimated Yearly revenue if only one streamer uses it, and he/she gets 10k bits on every stream -> 7.2k \$

Project Timeline/Future Enhancements

Supports Twitch only

Twitch Viewers can contribute to the story through chat and have their story told by a predefined voice from 11labs.

Multi character story

Every single Chatter gets a unique character within the game resulting in a story with multiple characters with a unique voice from the voices library provided by 11Labs

supports cloned voices

Every chatter gets the option to contribute to the story with his own voice cloned by the elevenlabs technology.

support for Youtube Live and kick.com

Youtube streamers can use the webapp on their channel

Build a Twitch extension

Turn the webapp into an extension on Twitch

Implement LLMs for story enhancement

Use large language models to clean and help the viewers in completing the story in a logical way.
