Chat with Isabella

Have a conversation about your favorite book   5/5 ⭐

Ah, dear reader, choosing a favorite food is as challenging as picking a favorite book from the vast library of knowledge! However, if I were pressed to choose, I must say that a warm and comforting bowl of homemade vegetable soup is quite the delight. There's something magical about its nourishing goodness and how it soothes the body and soul. What about you, my dear interlocutor? What culinary creation brings you joy?
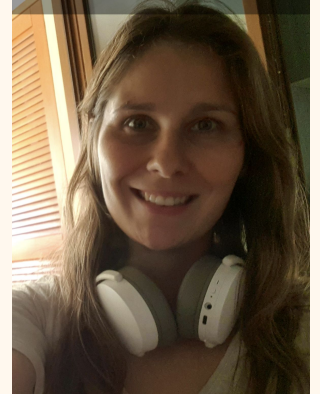

What is your favorite food?

2. Problem

- Solve a problem that affects many people: the quest for new ways of communication with technology, beyond the conventional keyboard input - getting personalized answers in natural language.
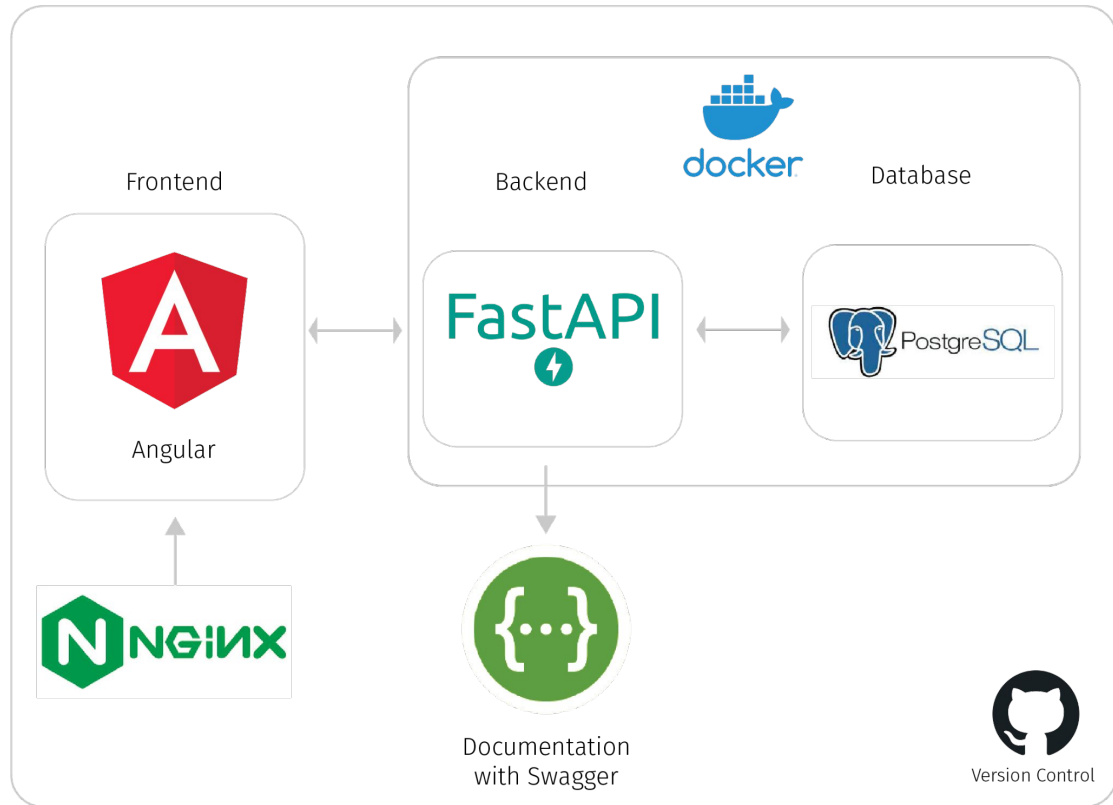

3.1 Solution

- Our goal is not only to promote the joy of discovery and product design as well as creating barrier-free solutions for people with physical disabilities, enabling them to utilize technologies such as artificial intelligence.

4. Market size

We live in an age where voice assistance systems are becoming ever more ubiquitous. With almost everyone carrying a tiny computer in their pocket at all time, the potential users for such an interactive application are skyrocketing. With a safe mode for kids, for learning students, at the workplace and just in a relaxing home environment. This app is for everyone.

Market for AI:
< 300 billion dollar

5. Revenue stream

- Specific commercial applications for businesses: such individualized characters to create a unique brand experience, customer service bots, internal helpdesk ..
- Subscription system
- In-app-pay for creation of custom characters
- Free trial to increase user amount

https://blablaland.tech

6. Next steps / backlog

- Permission system for API

- User registration

- secure payment system to enable transactions and monetization

- improved design by an actual UX designer

- Reduce latency

- Marketing campaigns

- Develop a mobile version (app) of the software and make our current design mobile friendly for increased accessibility and convenience.
