Thread of Life

Aug 13th, 2023 3D/AI Modeling Lablab.AI Hackathon

Washakes, RockyDev, 8gratitude8

Problem - Building 3D Models

Steep Learning Curve for 3D Modeling

Requires massive GPU compute power for efficient generations

Hard to optimize design flow for quick collaborations

Solution

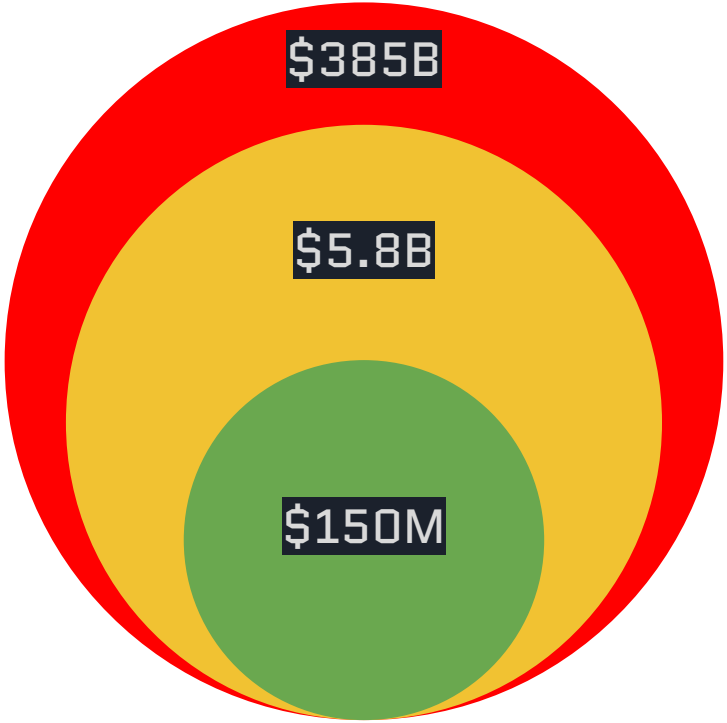
Thread of Life - Spin up 3D models from images of clothing in seconds

Cost Effective

Faster Iterations

Efficient Collaboration

Market by 2025



Total Market $385B

Professionals, hobbyists, students, and enterprises across the fashion industry

Serviceable Market $5.8B

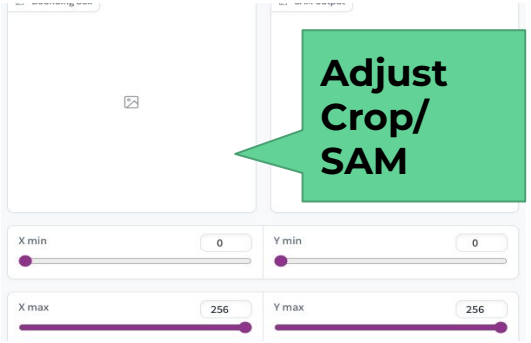
Designers, artists, developers, and fashion studios seeking an accessible, efficient, and collaborative 3D modeling solution.

Services Obtainable $150M

Individual freelance designers, small design studios, independent studios, educational institutions, and emerging brands.

Gen AI for Fashion Using One-2-3-45

User: Uploads an image or 2D model of their clothing.



Adjust Crop/ SAM

Generate: Click to run 3D Gen AI model

One-2-3-45

Adjust Param

Running on localhost
