# Who Am I?

Hi, I'm Paul from UK - I have over 20 years of IT Experience and from crypto and blockchain to AI as my main passion - I'm part of Buildspace S4 which runs for another 26 days so this hackathon is related to what I am doing there. I do teaching and consulting on AI and love helping people and automation and systems.

FUN FACT: I've had two kidney transplants

FUN FACT 2: My wife is from Tokyo

FUN FACT 3: I CAN'T code Python

# The Pain Point

Content creators need timely and visually appealing content. What if this process was automated?

# The Solution

Introducing Midjourney Automated  
Agent Maven (Ma'am):

Streamlining content creation with AI

Check the associated video.

# How It Works (Briefly)

- This is just a small demonstration of what can be achieved if you are creative in your use of automated Midjourney bots in your business especially with other automated bots working along side it.

# Technologies

databutton

BeautifulSoup

Google APIs

OpenAI

Streamlit

Powered by state-of-the-art AI models, integrating with top platforms for real-time efficiency.

# Prospects & Applications

From personalized e-commerce gifts to attention-grabbing blog visuals, the potential is vast

# Product Differentiation

Innovation, Creativity, and Disruption:  
Why Ma'am stands out? It will create  
whole new categories of Customised  
Ecommerce utilising AI. Think of an  
image marketing "Jasper" for  
Marketers

# Business Value & Revenue

Think of a Jasper or Copy.ai valuation by being built for marketers - their go-to Marketing Graphics platform - sales pages, e-commerce, social media, google ads...

# Conclusion

- Join us on this journey to redefine content creation. Invest in the future."
