

AI Autonomous Agents Hackathon

# VIZGPT

An Agent to chat with datasets along with  
visualizations

 [vizgpt.streamlit.app](https://vizgpt.streamlit.app)

# Problem

The problems of a day to day ML/DL Engineer

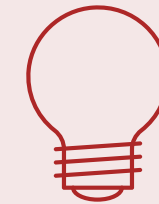

[vizgpt.streamlit.app](https://vizgpt.streamlit.app)

## **NON READABLE DATASETS**

Machine Learning and Deep Learning Datasets are not readable in raw format

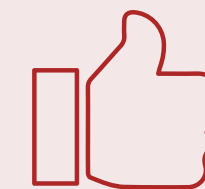

---

## **HASSLE TO VISUALIZE**

It's quite a hassle to visualize the dataset

---

## **COMPLICATIONS**

The bigger the datasets, the more are the complications to understand and visualize it

# Solution

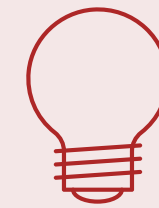

How VizGPT solves the problem

[vizgpt.streamlit.app](https://vizgpt.streamlit.app)

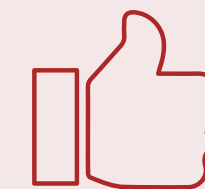

## **MAKES THE DATA READABLE**

With the help of GPT 3.5, VizGPT makes the data quite readable for even a non ML person to start playing with it

## **EASY TO VISUALIZE**

Now plot charts and graphs with just conversations

## **ARTIFICIAL INTELLIGENCE**

Now you can chat with the datasets as if it has its own brain
