

Odoo AI Store

ABDULLAH JABER

Main Idea

In areas where internet speed is very slow and opening an heavy ecommerce website full of images can take forever.

Odoo Ai store can help you purchase what you need by using text only so you can use whatsapp or telegram or even SMS so you do not need to use internet at all.

Odoo AI store can help you pick the right product by explaining your needs only.

How it works

Langchain react agent is used to deal with user through chat interface running by Gradio,

any text coming from user first we get relative product from weavite vector DB

,then send all info to gpt-4 to decide which tool to use from following tools:

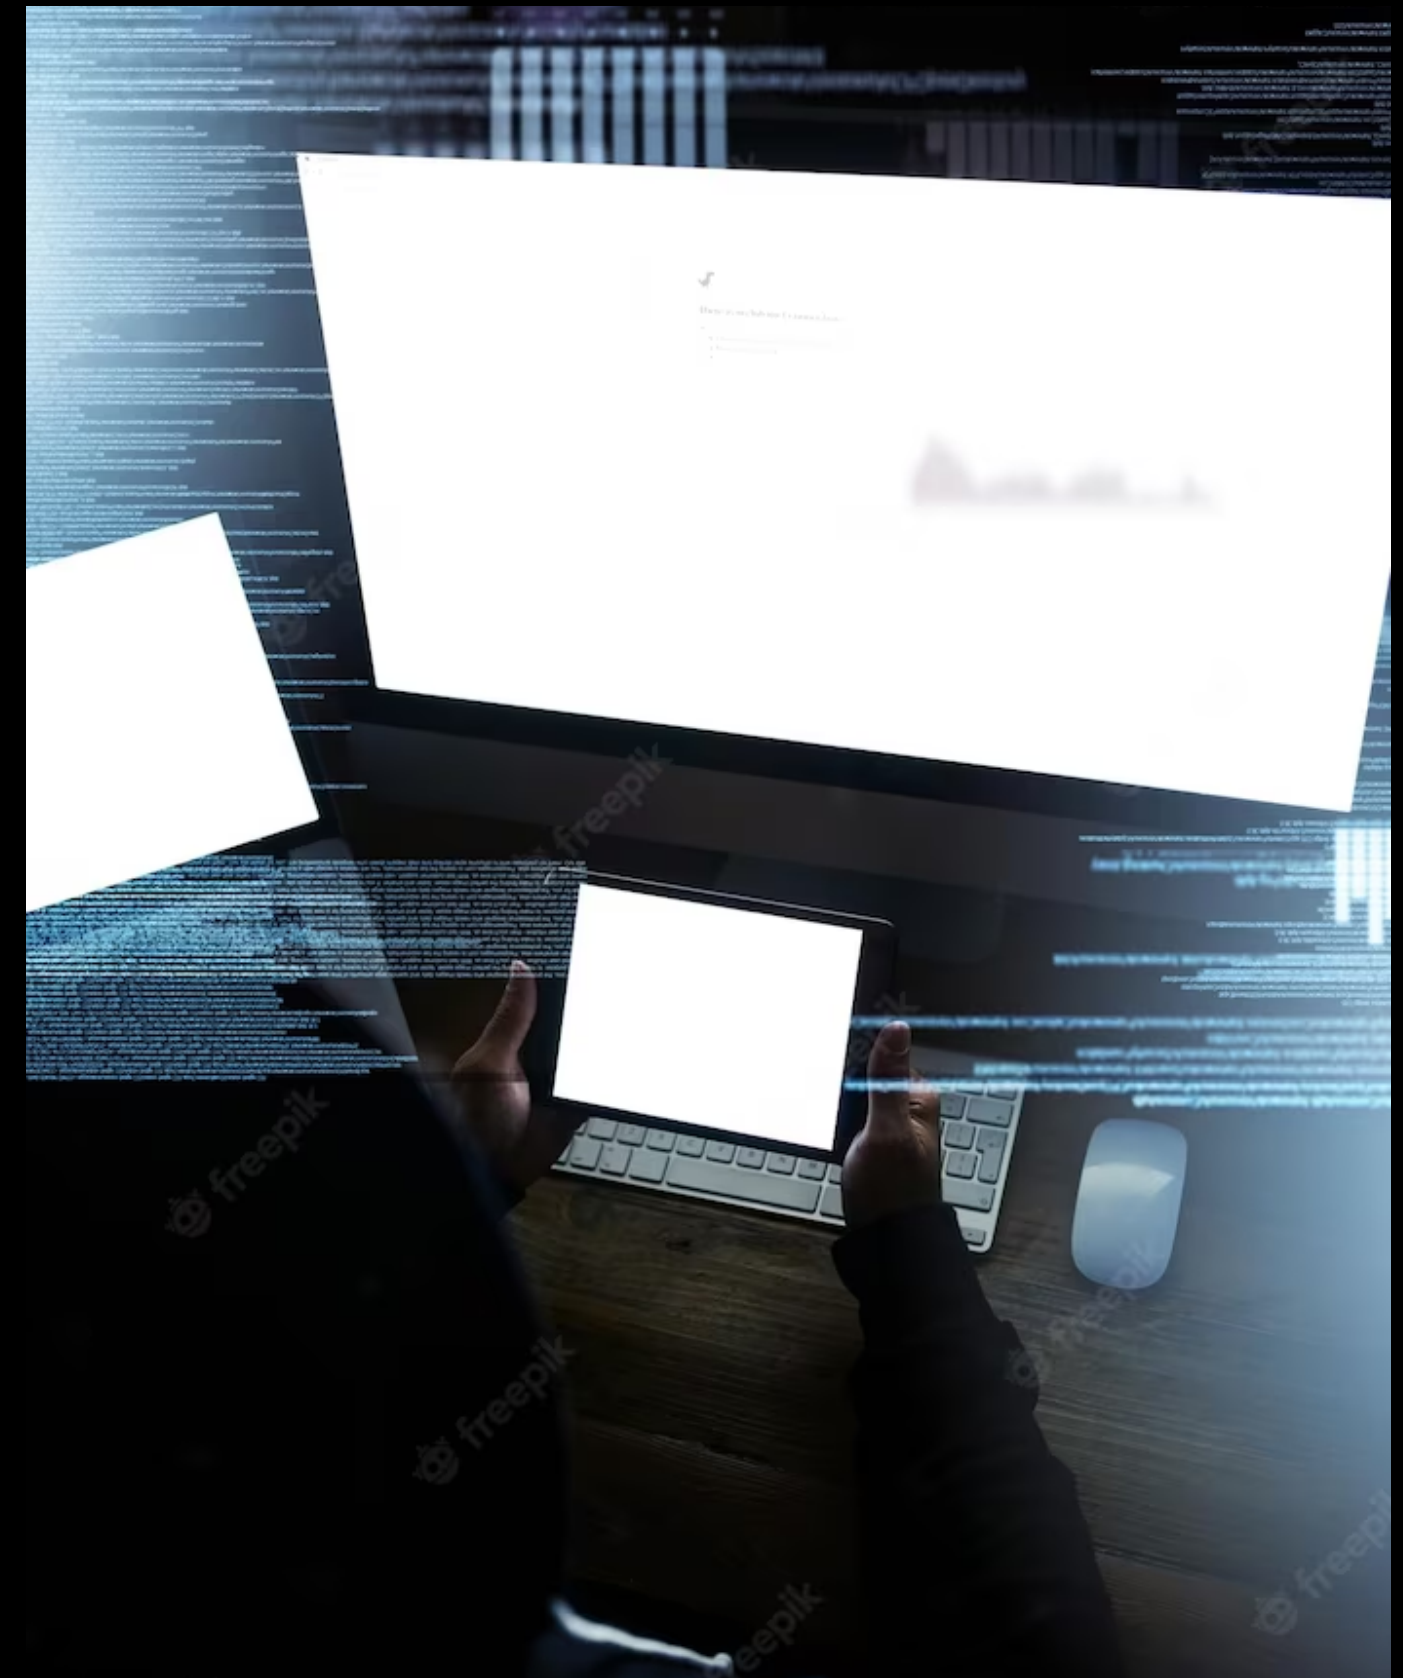

tools

- 1- if specific product mentioned will use odoo api to get product info.
- 2- help user to get best product or using google to help to find useful product.
- 3- place order if user decide what to get(dummy implementation)

Show Time

Use Cases of Odoo AI

Odoo AI can be used in various e-commerce not only Odoo, and can reach many people even those do not have internet access or internet quality is bad.

by adding speech to text and text to speech the opportunities will be endless.

Thanks!

Abdullah Jaber
