<u>Autonomous Agents Hackathon</u>

Autonomo

The Twitch streamer's most useful tool for taking care of your community.

Problem

Twitch Stats

2,000,000+

Streamers

25,987

Twitch Channels with active extensions

10,000,000

Daily Active Users

Problem

Live Streamers lack of time and opportunity for responding to every message from their fans during the live stream.

Live Streamers finds it hard to remember who their fans are and their last interaction with them, which makes it a weird of a relationship between the streamer and their fans.

Potential sponsors can't decide easily which streamer's community is the right one to promote their product/service.

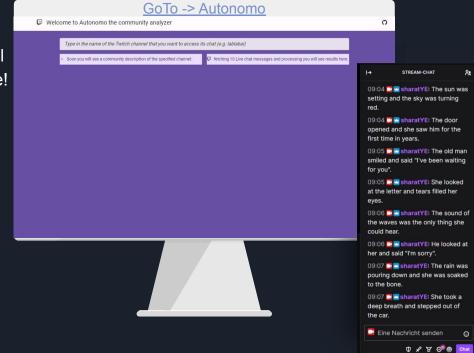

Autonomo

A chatbot that enhances the relationship between fans and live Streamers/Broadcasters, analyzes the community formed by fans and classifies them into a category. The Live streamer is then able to put the category its community classifies under in a marketplace where potential sponsors would search for the right one to promote their product/service.

works on mobile and all web browsers out there!

Business plan

Target customers

Content creators, Live Streamers and Influencers and their viewers

Pricing

Twitch extension bits cut 80% Streamer 20% Developer.

freemium Model (Limited for free)

Revenue

Estimated Yearly revenue if only one streamer uses it, and he/she gets 10k bits on every stream -> 7.2k \$

Project Timeline/Future Enhancements

Supports Twitch only

Twitch viewers get answers from an LLM from within the chat section.

A Marketplace with brief summary of what the streamers channel and its community is interested in (useful for potential sponsors)

special agent for every single chatter

Every single Chatter gets a unique agent that understands him and know how to provide him with a satisfying response.

Implementation of a VectorDB

Autonomo is able to build a VectorDB from old chat messages of previous streams resulting in:

-Twitch viewers get individual answers relevant to what the public chat has been talking about.

support for Youtube Live and kick.com

Youtube streamers can leverage the power of Autonomo for their channel

Build a Twitch extension

Turn the webapp into an extension on Twitch

To be continued..

We'll see what we can enhance even more in the future. let me know if you have any features that can be added.

Thanks for checking out

Autonomo
