DevHire Extended is a project by Prometheus

Our Team

## The Problem:

Companies face a challenge in identifying the most suitable candidates from a pool of resumes and conducting efficient interviews. Traditional methods lack automation and comprehensive evaluation, resulting in resource-intensive hiring processes and potential mismatches.

## The Solution:

Our solution streamlines the recruitment process. Through AI-driven resume analysis and interview simulations, we enable companies to efficiently shortlist candidates based on key criteria and conduct consistent, unbiased interviews.

By harnessing technology, we enhance hiring precision, saving time and resources while ensuring a more effective candidate match.

## REVENUE STREAM:

1. **Enterprise Solutions:** Creating custom solutions for larger companies to optimize their recruitment processes, charging a higher fee for tailored services.
2. **Advertising and Sponsorships:** Allowing relevant companies to advertise their products or services to our user base, generating advertising revenue.
3. **Data Analytics Insights:** Providing companies with data analytics and insights about user preferences and trends in the job market for a fee.
4. **Referral Programs:** Establishing a referral system where users can earn rewards for bringing in new subscribers or companies to the platform.
5. **Freemium Model Upgrades:** Offering free basic services and charging for additional features, enticing users to upgrade to premium plans.
6. **Partnerships with Recruitment Agencies:** Collaboration with recruitment agencies, charging a fee for providing them with access to the platform's candidate pool.

# Market Size:

- 41% of companies around the world use AI chatbots to **engage with candidates** during recruitment.
- 44% use AI to **filter the best candidates** based on information available on the internet like social media profiles.
- Early AI recruitment adopters have seen their cost per screening candidate **reduced by 75%**.

Considering the global statistics above it is clear that companies all over the world are leaning into the idea of using AI for their recruitment process which makes the market size of Recruitment Chat Bots **unlimited!**

# What's Coming Next?

## **Career Mentor:**

AI will scan the Resume for your interests, experience, and skill level and provide you with a **structured roadmap** consisting of courses, projects, and skills you should learn. This will help users with finding the **guidance and mentorship** they need.

## **Job portal:**

A section where users can use AI to scan for a job that matches with their Resume data and **easily apply** by sending in their online interview scores and reports, **making it easier** for both Job-Seekers and Job-Providers to find their **perfect match!**
