# STOCK MARKET ANALYSIS

SUBMISSION BY TEAM-X

# HISTORICAL TIME DATA ANALYSIS

We are making use of Yahoo Finance to get the Stock data and making use of various mathematic algorithms which include distribution analysis and Price movement action to get back the dates for which our algorithm believes are the dates in which there is a Significant movement.

# LOGIC

- So for the dates that we have filtered out from our algorithms which tells us about the extreme points, we send those dates to our agents and they look for the news on the web using serpapi and return us back with a description and the sentiment which you can see in the SLIDE BELOW, which contains a shot from the POSTMAN.
- We also are giving a future based prediction of news opinion on that stock as well, so we can help our customers stay ahead.

Overall sales declined 1% as iPhone, iPad, and Mac sales flagged, despite beating soft expectations on profit and revenue. The decline in sales caused Apple to lose its \$3 trillion market value. Wall Street also ended lower after the US jobs report, with Apple weighing on the market. However, Apple surprised in China and set high sales in India during the sales slump. Additionally, Apple hit 1 billion paid subscriptions. Tim Cook addressed critics regarding Apple's AI efforts being behind Microsoft, Google, and Elon Musk. AAPL's Q3 2023 performance can be seen in Jason Snell's colorful charts."}, {"Date": "2023-08-07", "Sentiment": "negative", "Related\_Data": "Shares of Apple continued their post-earnings plunge on Monday, falling 1.7% despite a rebound in the broader market. The tech giant has now lost over \$200 billion of its market cap since Thursday."}], "Future Date data": [{"Date": "2023-08-21",

# DEPLOYMENT

- We have deployed our application on hatchabox and we have created our entire frontend and backend on ruby and rails and we have made use of AWS LAMBDA for deployment of our logic as well.
