

# Food fusion

Your AI kitchen assistant

# Team mates

**NIMRA FAYAZ**

Software engineer

**ABDULLAH KHAN**

3D artist , game developer

# Our target Audience

Every single person who eats..!

# How it works..

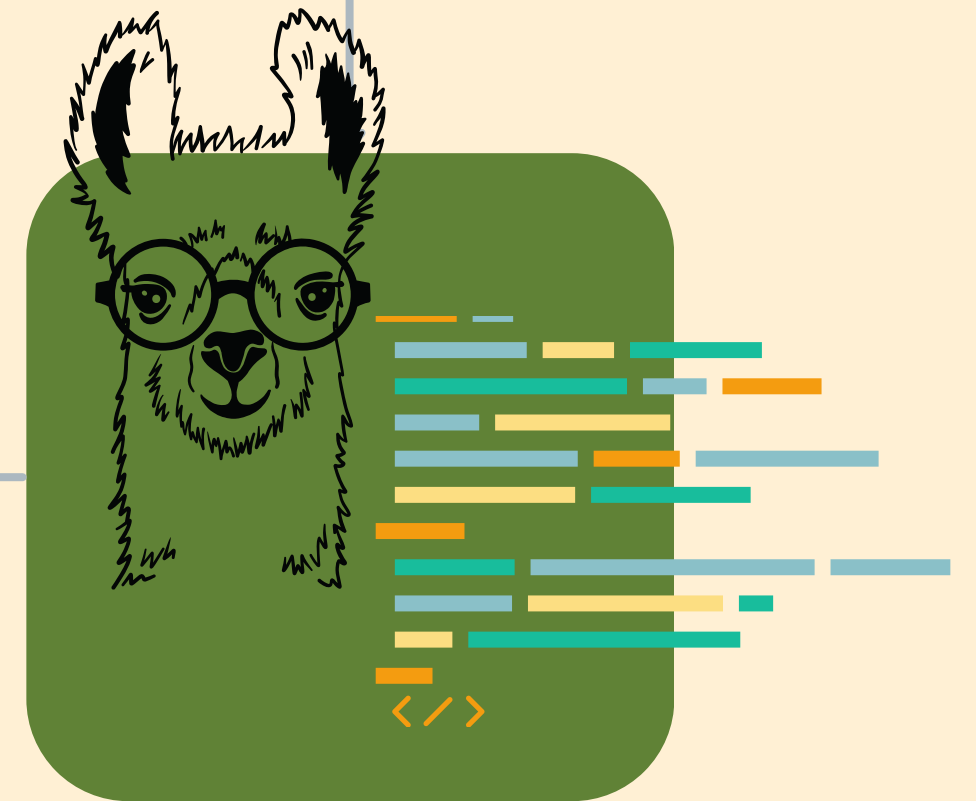

upload the photo of ingredients.

A food item recognition model through clarifai will process that image and return the ingredients identified

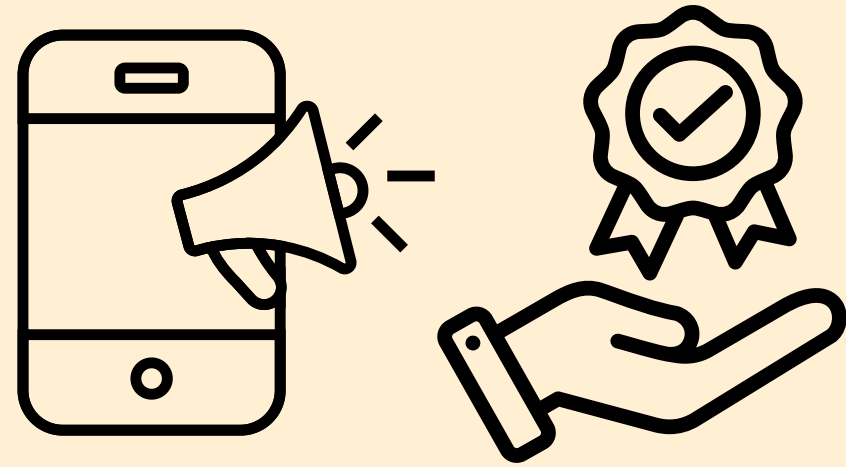

Here we go with the multiple recipe ideas...!!!

Those ingredients will be passed to llama2 to generate recipes out of them.

# Revenue Stream & future works

## Subscription Model:

Offer a premium subscription that provides access to advanced features, personalized recipe recommendations, exclusive recipes from renowned chefs, and ad-free experience.

## Recipe Collections:

Sell specialized recipe collections or cookbooks within the app. These could focus on specific cuisines, dietary preferences, occasions, or health goals

**A Quick Demo..!**
