INDEX

- Motivation
- Solution
- Design
- Business plan
- Future work

MOTIVATION

- It is really difficult to choose the best option when trying to rent or buy a property

- Need to navigate different portals

- Information is put in long descriptions

- Very time consuming

SOLUTION

RECA

A friendly chatbot assistant that will show you what you really are looking for

It accesses a database with all the properties available in the market and chooses the one that fits you best

Easily access key information, without needing to read the millions of descriptions

DESIGN

Generative AI models

Clarifai platform

Streamlite

MongoDB

BUSINESS PLAN

Partner with real estate portals

Commisions from sucessful sales

We could also show ads in our website

FUTURE WORK

1

Add more features like: saving favorite apartments the user has seen so far

2

Extract relevant information for the user from the pictures posted on the portals

3

Integrate known API such as Idealista
