# Problems

- Are you frustrated with manual data extraction from PDFs?
- Tired of searching for answers in lengthy PDF manuals and documents?
- Fed up with endless research document searches?

# Solution

## S

- DocuChat a documents chatbot for automated data extraction, saving time and reducing errors.
- DocuChat a documents chatbot for instant answers, simplifying complex document searches and improving user experience.
- DocuChat a research-focused documents chatbot for quicker, more efficient literature review and research.

# Market Size & Opportunity

---

- The global document management software market was valued at over \$5.5 billion in 2023.
- Academic institutions and researchers can benefit from Documents-based chatbots for quicker access to research papers and academic documents.
- Law firms and regulatory agencies can utilize Documents-based chatbots to efficiently search and retrieve information from legal documents.

# Future Plans

Forge partnerships with document software, cloud storage, and industry-specific providers to boost chatbot functionality and value across sectors.

Provide AI model customization for clients, enabling tailored chatbot solutions aligned with their document-related needs and workflows.

## Initial Launch

The project's initial launch will introduce a powerful PDF-based chatbot, revolutionizing document accessibility and search.

## Partnerships

Forge partnerships with document software, cloud storage, and industry-specific providers to boost chatbot functionality and value across sectors.

## AI- Customization

Provide AI model customization for clients, enabling tailored chatbot solutions aligned with their document-related needs and workflows.
