The Problem BPBot Solves

Disconnected Investors

BPBot provides investors with a comprehensive overview of a business's potential by providing comprehensive, structured, and organized business plans. Including Market and Business Model Analysis.

Difficult Business Planning Process

BPBot simplifies the planning process by utilizing image recognition AI technology that analyzes and creates viable business plans in record time.

Complex Business Data

BPBot employs customized model-building functions to provide insights that extend beyond conventional analysis, making sense of the most complex business data.

BPBot's Solutions to the Problem

1 Image Recognition AI Technology

BPBot distinguishes generic business components, along with the intricacies that make a business unique, using its AI-powered Image-to-Plan Transformation technology.

2 Custom Model Building Function

BPBot provides a crowdsourcing platform for validation and improvement of automatic annotation for text chunks used in custom Llama2 model creation

3 Pre-Structured Business Plans

BPBot converts images to well-structured and actionable business plans and got-to-market strategies,

** complete with financial projections, market analyses, and executive summaries **

The Market Size that BPBot Addresses

1

Small and Medium-Sized Businesses

Entrepreneurs and SMB owners often have limited budgets and resources to invest in business plans. BPBot enables them to craft a comprehensive and strategic business plan that meets their unique requirements.

2

Venture Capitalists and Angel Investors

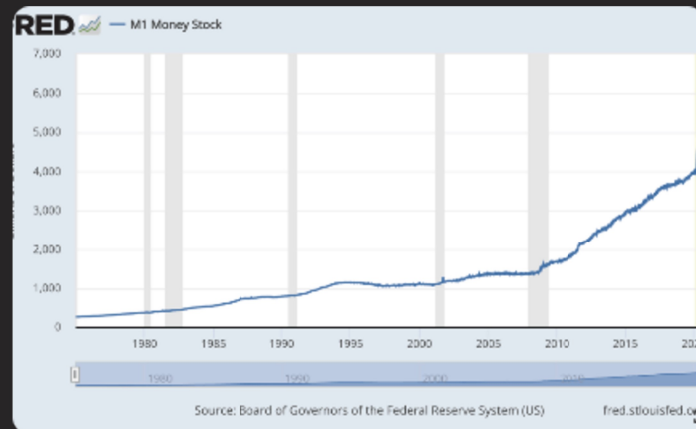

Investors lack proper information on business ventures that increase the risk of their capital investments. BPBot helps investors make informed decisions by providing streamlined and comprehensive business plans.

3

Corporate Incubators

For corporate incubators, BPBot ensures that business plans can be created under one uniform structure that aligns with a corporation's priorities.

Revenue Streams from BPBot

Subscription Models

We offer flexible and reasonable subscription models to our valuable business and investor customers.

Pay-Per-Use

For customers who do not require regular use, they can take advantage of our Pay-Per-Use business model when needed.

Extra Addons

We provide extra add-ons that support marketing plans, PR activities, legal and financial advisers for our business customers and investors to supplement our core business functionality.

Road Map and Next Steps

Next Steps

1. Increase Coherence between business plan and go-to-market plan
2. Increase the quality of the fine-tuned model
3. Improve crowdsourcing validation algorithm
4. Increase size and quality of outputs
5. Propose model versions based on clarifai evaluation results
