What is Translingo about?

Problem:

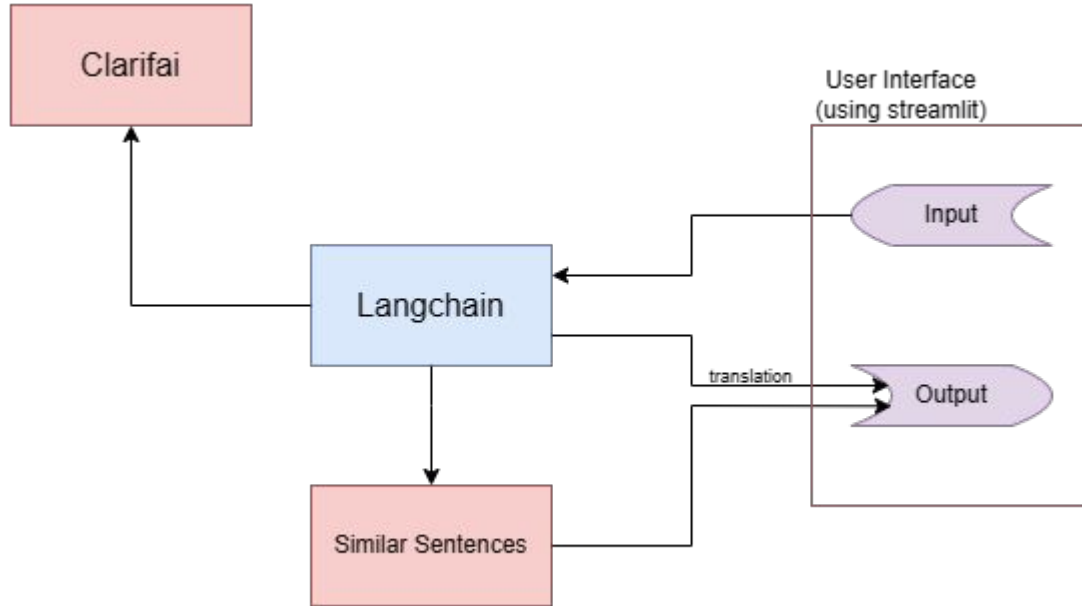

While dealing with some other region like a different state or a country which has different native languages, the communication become difficult as the chances of the individual knowing that particular language is very low.

Solution:

"Translingo - Instant sentence translator" is an app that will help break the communication barrier between two individual speaking different languages.

This apps basically translates a given sentence of any language to english. Not only translates but also tells about the grammar and gives the similar sentences for learning purpose.
