# QuakeAI

The Story Lovers most useful
Tool for Entertainment.

# Problem

Live Streamers lack of content

Authors and writers pay so much money to turn their stories that are written on papers to an audio spoken with their own voice or a premade one with high quality background music and publish it.

Content creators of shorts & reels are prone to demonetization or DMCA takedowns for the music they play on their videos.

# Solution 😲

## QuakeAI

An **Audiobook Generator** that **enables Authors, Writers and live Streamers/Broadcasters** to generate Spoken stories with AI generated background music that brings life to it.
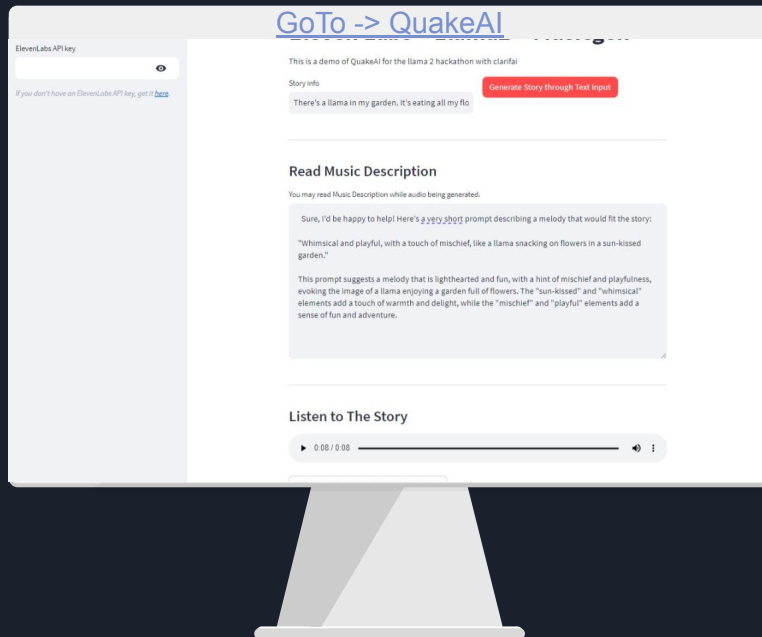

# Use cases

- QuakeAI is a great way to for Live Streamers to keep their viewers entertained by contributing to a story
- Authors and writers would never believe how easy it is to turn their stories written on papers to an audio spoken with their own voice or a premade one with high quality background music and publish it on Audible within a click of a button!
- Content creators of shorts & reels will generate music for their videos without worrying about demonetization or DMCA takedowns.
- Authors can brainstorm shorts stories with other author through a chat room and QuakeAI would make an Audiobook out of it.

# Demo 🤗

works on mobile and all web browsers out there!

# Business plan 😎

## Target customers

Authors, **Writers, Content creators, Live Streamers** and **Influencers and their viewers**

## Pricing

**Twitch extension bits cut 80% Streamer 20% Developer.**

**freemium** **Model (Limited for free)**

## Revenue

Estimated Yearly **revenue with 100 active user subs and 20$/mo subscription -> 24k$ + 7.2k$ from Twitch extension**

# Project Timeline/Future Enhancements

August | September | October | November | December | Janauray

### User only pormpt

Users provide the storyline to generate Audiobook

### Fully autonomous

Users only click a button and provide a description for the story direction and QuakeAI takes over to generate an Audiobook with no further intervention user's side.

### production workflow

Users get to publish their Audiobooks with a click of a button

### Home of stories Lovers

A Marketplace community can share their masterpieces that they made with QuakeAI, and have other read it and rate it.

ex. someone shares a music for meditation with someone telling calming things.

### Build a Twitch extension

Turn the webapp into an extension on Twitch

### To be continued..

We'll see what we can enhance even more in the future. let me know if you have any features that can be added.

# Thanks for checking out
