VISION

Your ultimate chatbot for precise, insightful medicine information, nurturing a healthier life through informed decisions.

Elevating Health Literacy: Your Reliable Companion for Pharmaceutical Guidance in Every Query.

THE PROBLEM

People often have difficulty finding accurate and up-to-date information about prescription and over-the-counter medications. This can lead to confusion and uncertainty about how to take medications safely and effectively.
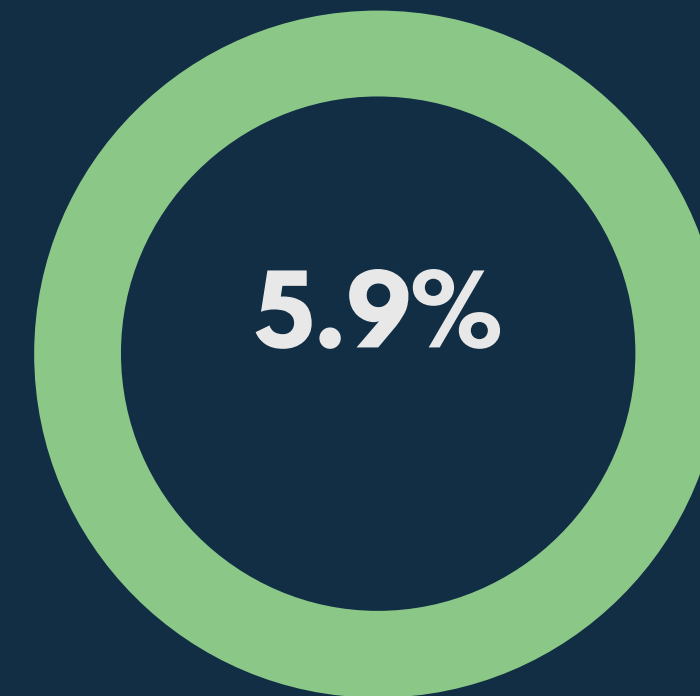

TARGET MARKET AND OPPORTUNITY

Pharmogle caters to a broad audience, including patients, healthcare professionals, and caregivers seeking accurate information about prescription and over-the-counter medications.

$222.4 BILLION

Compound Annual Growth Rate (CAGR)

THE SOLUTION

Pharmogle provide people with accurate and up-to-date information about medications. It is programmed with a vast database of information about medications, including their benefits, risks, side effects, and how to take them.

Pharmogle can be accessed 24/7, so people can get the information they need when they need it. It can also be used by people who are not comfortable talking to a doctor or pharmacist about their medications.

KEY FEATURES

Intuitive interface:
Effortless exploration of medical insights.

Available 24/7:
Answers at your fingertips, around the clock.

Personalization:
Tailored responses for your individual health inquiries.

BENEFITS FOR PATIENTS AND CARETAKERS

Instant Information:
Obtain swift and accurate insights about medicines, precisely when you need them
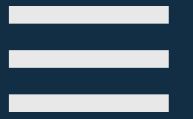

Empowered Decision-Making:
Make informed health choices by gaining valuable understanding about medications and their effects.
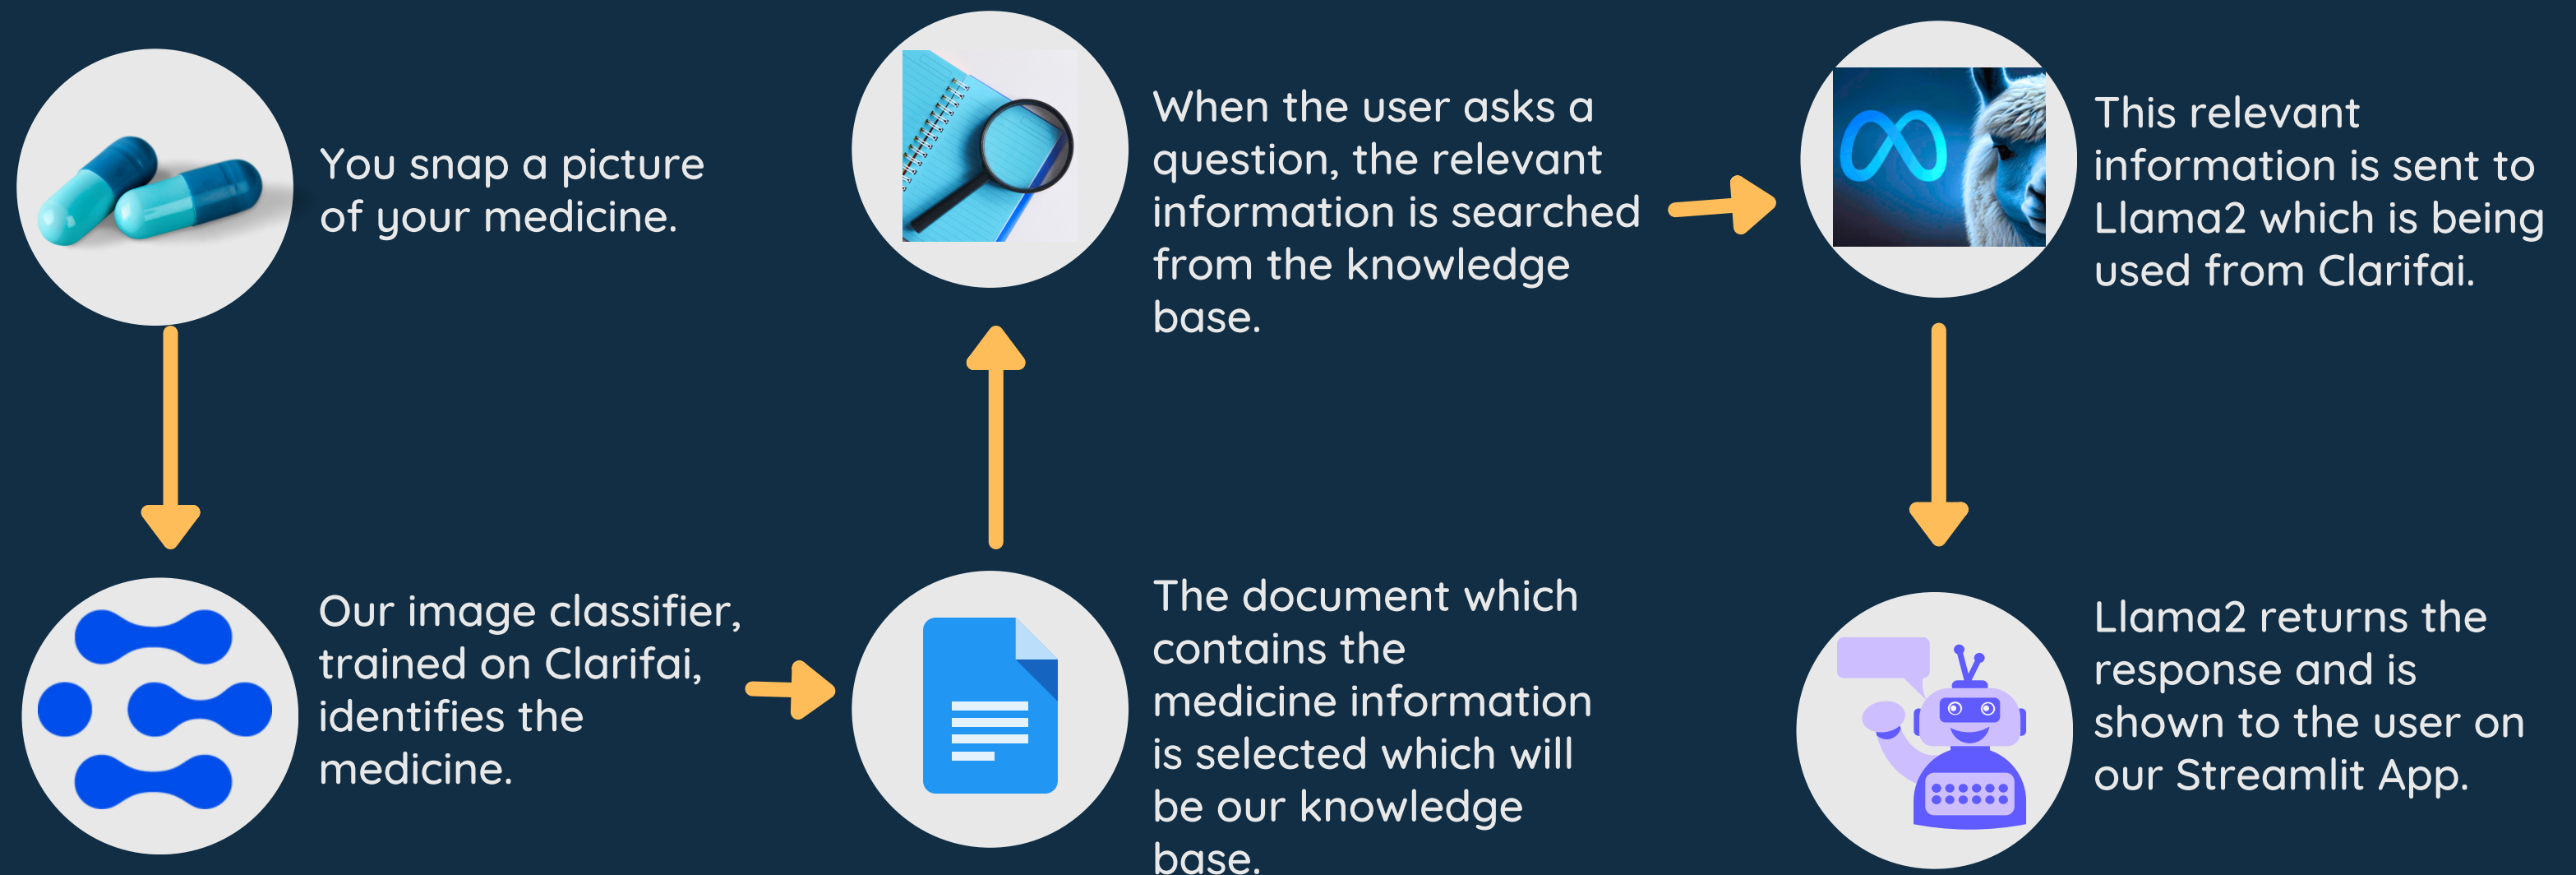

Enhanced Health Literacy:
Elevate your knowledge of pharmaceuticals, promoting a healthier and more informed lifestyle.

HOW IT WORKS

You snap a picture of your medicine.

When the user asks a question, the relevant information is searched from the knowledge base.

This relevant information is sent to Llama2 which is being used from Clarifai.

Our image classifier, trained on Clarifai, identifies the medicine.

The document which contains the medicine information is selected which will be our knowledge base.

Llama2 returns the response and is shown to the user on our Streamlit App.

REVENUE MODEL

FREEMIUM

Enjoy essential features for free, or elevate your experience with premium upgrades for enhanced insights and convenience.

SUBSCRIPTION

Choose your path to exclusive insights: opt for monthly or annual subscriptions, unlocking premium features for an enriched medication exploration journey.
