Introduction

Overview of ConvoClips, a revolutionary video creation platform.

The Problem

- Traditional video editing is complicated and time-consuming.

The Solution

- ConvoClips simplifies video creation through conversational AI, Tech Llama.

Technology Stack

- Built on Python Flask, Canvas, and Fabric.js.

User Experience

- Dual-panel interface with a chat window and a live canvas.

How It Works

- Users chat with Tech Llama to create and edit videos in real-time.

Features

- Real-time updates, pre-designed templates, and advanced features like real-time collaboration.

Use Cases

- Ideal for educators, marketers, storytellers, and professionals.

Scalability

- Optimized for both individual and enterprise use.

Conclusion

- ConvoClips is a new, simplified way to create videos through natural language interaction.

Q&A

- Open floor for questions.
