

# HerbGuard

A Health & Wellness App that guides users through legal marijuana compliance, personal assessment, and education about plant varieties.

# ● Problem

Developing a Health & Wellness App focusing on legal marijuana compliance, personal assessment, and plant education faces the challenge of navigating complex and evolving legal frameworks surrounding cannabis usage, ensuring secure store of sensitive personal assessment data, and delivering accurate and engaging educational content about various plant varieties.

## Solution

To address these challenges, The Health & Wellness App is designed to bridge the gap between cannabis education and user needs. It empowers users with accurate information, personalized recommendations, and a secure platform for exploring the health benefits of various cannabis plant varieties.

# Chunk Breakdown

## **Backend System Setup**

User Authentication

Payment Gateways Integration

## **User Information and Legal Compliance**

User Data Collection

Local Laws Assessment

## **Access Control and Verification**

Age Verification

Legal Issue Check

## **Personalized Assessment and Chabot**

Personal Note and Security

Chabot Integration

## **Educational Content and Plant Recognition**

Educational Material Design

AI Recognition Integration

## **Testing, Refinement, and Deployment**

Thorough Testing

User Feedback Refinement

App Deployment

THANK YOU
