Audiocraft-Hackathon

QuakeAI

The Story Lovers most useful
Tool for Entertainment.

Problem

Live Streamers lack of content

Authors and writers pay so much money to turn their stories that are written on papers to an audio spoken with their own voice or a premade one with high quality background music and publish it.

Content creators of shorts & reels are prone to demonetization or DMCA takedowns for the music they play on their videos.

Solution 😛

QuakeAI

An **Audiobook Generator** that **enables Authors, Writers and live Streamers/Broadcasters** to generate Spoken stories with AI generated background music that brings life to it.
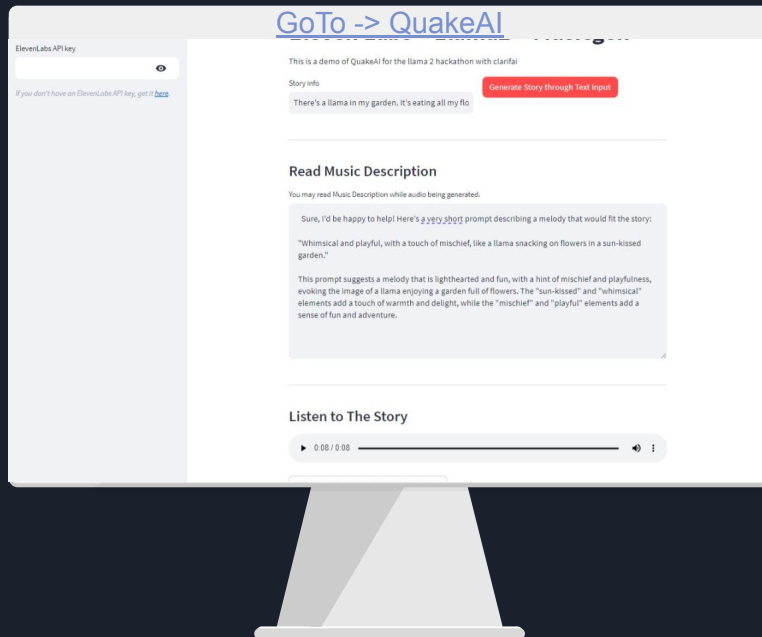

Use cases

- QuakeAI is a great way to for Live Streamers to keep their viewers entertained by contributing to a story
- Authors and writers would never believe how easy it is to turn their stories written on papers to an audio spoken with their own voice or a premade one with high quality background music and publish it on Audible within a click of a button!
- Content creators of shorts & reels will generate music for their videos without worrying about demonetization or DMCA takedowns.
- Authors can brainstorm shorts stories with other author through a chat room and QuakeAI would make an Audiobook out of it.

Demo 🤗

works on mobile and all
web browsers out there!

This is a demo of QuakeAI for the llama 2 hackathon with clarifai

ElevenLabs API key

If you don't have an ElevenLabs API key, get it here.

Story info

There's a llama in my garden. It's eating all my flo

Generate Story through Text Input

Read Music Description

You may read Music Description while audio being generated.

Sure, I'd be happy to help! Here's a very short prompt describing a melody that would fit the story:

"Whimsical and playful, with a touch of mischief, like a llama snacking on flowers in a sun-kissed garden."

This prompt suggests a melody that is lighthearted and fun, with a hint of mischief and playfulness, evoking the image of a llama enjoying a garden full of flowers. The "sun-kissed" and "whimsical" elements add a touch of warmth and delight, while the "mischief" and "playful" elements add a sense of fun and adventure.

Listen to The Story

Business plan 🤓

Target customers

Authors, Writers, Content creators, Live Streamers and Influencers and their viewers

Pricing

Twitch extension bits cut 80% Streamer 20% Developer.
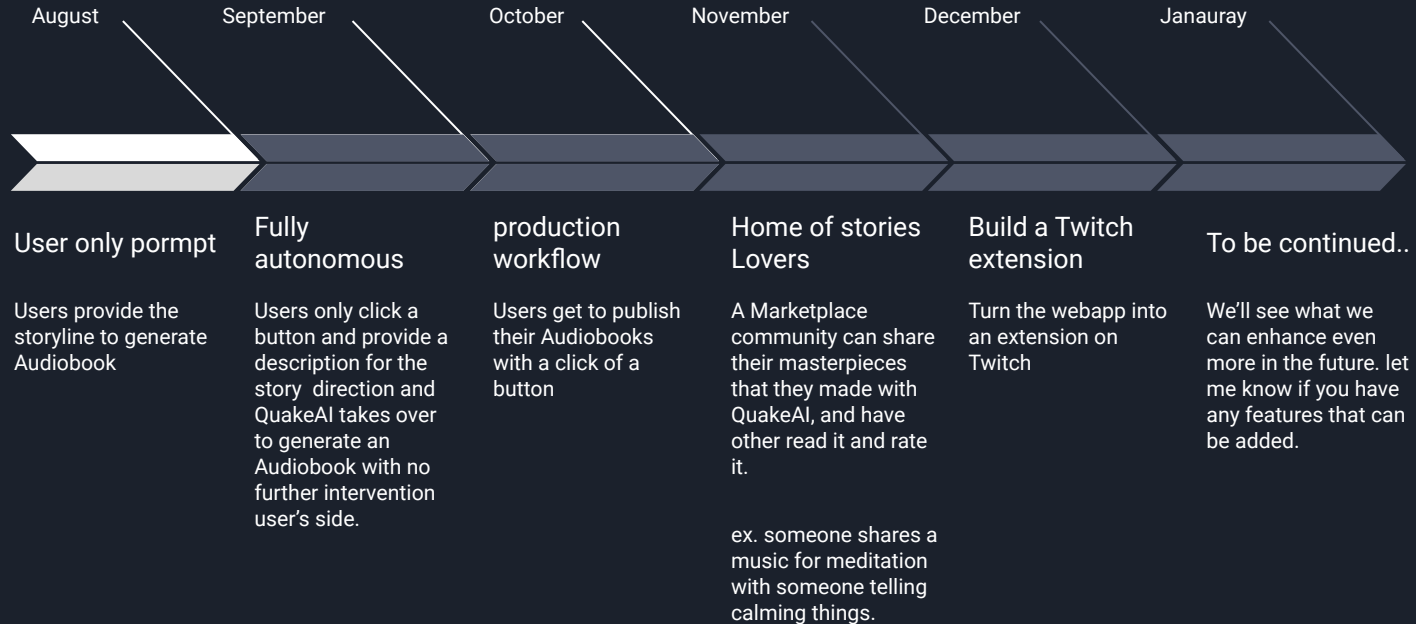

freemium Model (Limited for free)

Revenue

Estimated Yearly **revenue with 100 active user subs and 20$/mo subscription -> 24k$ + 7.2k$ from Twitch extension**

Project Timeline/Future Enhancements

August   September   October   November   December   Janauray

User only pormpt

Users provide the storyline to generate Audiobook

Fully autonomous

Users only click a button and provide a description for the story direction and QuakeAI takes over to generate an Audiobook with no further intervention user's side.

production workflow

Users get to publish their Audiobooks with a click of a button

Home of stories Lovers

A Marketplace community can share their masterpieces that they made with QuakeAI, and have other read it and rate it.

ex. someone shares a music for meditation with someone telling calming things.

Build a Twitch extension

Turn the webapp into an extension on Twitch

To be continued..

We'll see what we can enhance even more in the future. let me know if you have any features that can be added.

Thanks for checking out
