

# Lyric Lingo

Translate your songs in  
any language

# PROBLEM?

- A lot of times People like the song but do not understand the lyrics as they do not know that specific language and cannot enjoy the song to its fullest.

# Solution

Translates lyrics of any language to the language the user prefers

# How It Works?

**User Input:** allows users to input lyrics in one language that they want to translate into another language.

**Language Selection:** Users can select the source language of the input lyrics and the target language they want to translate the lyrics into.

**Translation:** When the user submits the input lyrics and language preferences, the app uses the Gradio Client to send a request to the Hugging Face translation model hosted at the specified API endpoint.

**User-Friendly Interface:** provides a user-friendly interface using Gradio components

# Technologies Used

- Hugging Face
- Gradio
- SeamlessM4T

# Future Works

- **Audio Translation**
- **Integration with Music Streaming Services**
- **Multi-Lingual Lyrics Analysis**
- **Additional languages**

**Thank You**
