FemGPT

What are some common menstrual problems, and when should women seek medical attention for these issues?

S Some common menstrual problems include:

1. Dysmenorrhea: Severe pain and cramps during menstruation.
2. Menorrhagia: Heavy bleeding during menstruation.
3. Amenorrhea: Absence of menstruation.
4. Premenstrual syndrome (PMS): Emotional and physical symptoms that occur in the week or two before your period.
5. Abnormal uterine bleeding: Irregular bleeding between periods, after sex, or after menopause.
