

**AskLAW:**

**A research Assistive Tool for Indian lawyers**

# What is the use case?

## Technical opportunity:

All Supreme Court and High Court Cases have been digitised from 1950 onwards. Hence the entire corpus is available on Supreme Court and high court websites.

## Business Opportunity:

Lawyers use paid research tools extensively as part of their case research journey. Current tools are based on keyword searches and hence can not answer Natural language queries.

# Existing MarketSpace

## Manupatra:

It is the only leading Legal research tool used in India. It has an extensive database of cases from the lower court up to the Supreme Court.

## Shortcoming:

It is keyword search-based and hence doesn't answer questions directly.

It cannot be used by the general public since it requires some initial understanding of legal know how

# Our Solution - AskLAW : [asklaw.streamlit.app](https://asklaw.streamlit.app)

**Data Used:** Kaggle Indian Legal Dataset

**Tools used:** Vectara and Anyscale

## **Features:**

- Ask questions in natural language
- Get a grounded answer with references
- The references have links to the original judgement.
- Metadata details about Court Name and Case name

## **Future Improvements:**

- Filter by Court
- Filter by Date
- Summary for each judgement
