

# PROG ASSIST

**Assess, Improve, Slay**

Presented by Muza & Ain Naziha

# INTRODUCTION

- ProgAssist is designed with a singular focus: to assess and elevate programmer skills to new heights.
- It goes beyond evaluation; it's a dynamic tool for continuous improvement.
- Beyond assessment, ProgAssist crafts personalized improvement plans, recognizing that each programmer's journey is unique.
- ProgAssist dynamically adjusts recommendations based on your progress, ensuring that your learning path evolves as your skills do.

**About Us**

# WHY IT MATTERS?

## Our vision

- Identify strengths and areas for growth.
- Stay competitive in a rapidly changing industry.
- Bridge the gap between where you are and where you want to be.

The screenshot shows a web application interface for 'Prog Assist'. At the top, there are three window control buttons (minimize, maximize, close) and a title bar. The main content area is dark-themed and contains a welcome message, a user profile, a skill test prompt, and an assessment history table.
