New Search Experience

Imagine a world where you can get instant answers to your questions about the latest innovations in vector databases and generative AI, powered by Weaviate's own expert blog content. That world is here today with our Weaviate Blogs QA Chatbot prototype.

Demo

Prospects

- Reference architecture and standard template for hybrid search for domain specific knowledge base question answering use case for every business.
- Accelerate generative AI adoption by offering rapid prototyping and production deployment using LangChain Template, LangServe, and LangSmith.
- Tight integration with the existing UI for seamless user experience.
