# PROBLEM

Market research for trading is expensive, research intensive, and is very important for market participants.

Market research on publicly traded companies is expensive and time consuming

Requires a large team with multiple experts who read 10-Q filings and follow market news

Interpreting the news correctly and quickly can lead to profitable trades.

# MARKET AI SOLUTION

We built an AI chatbot that can perform intelligent functions using  
Langchain, Cohere, and Weaviate

**A**

**Intelligent AI agents**

**B**

**Latest financial news for stocks**

**C**

**10-K, 10-Q filings & analysis**

**D**

**Real-time trading execution**

# TARGET MARKET

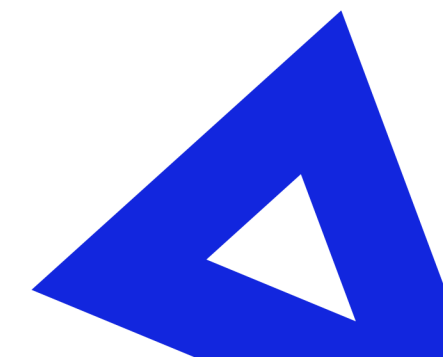

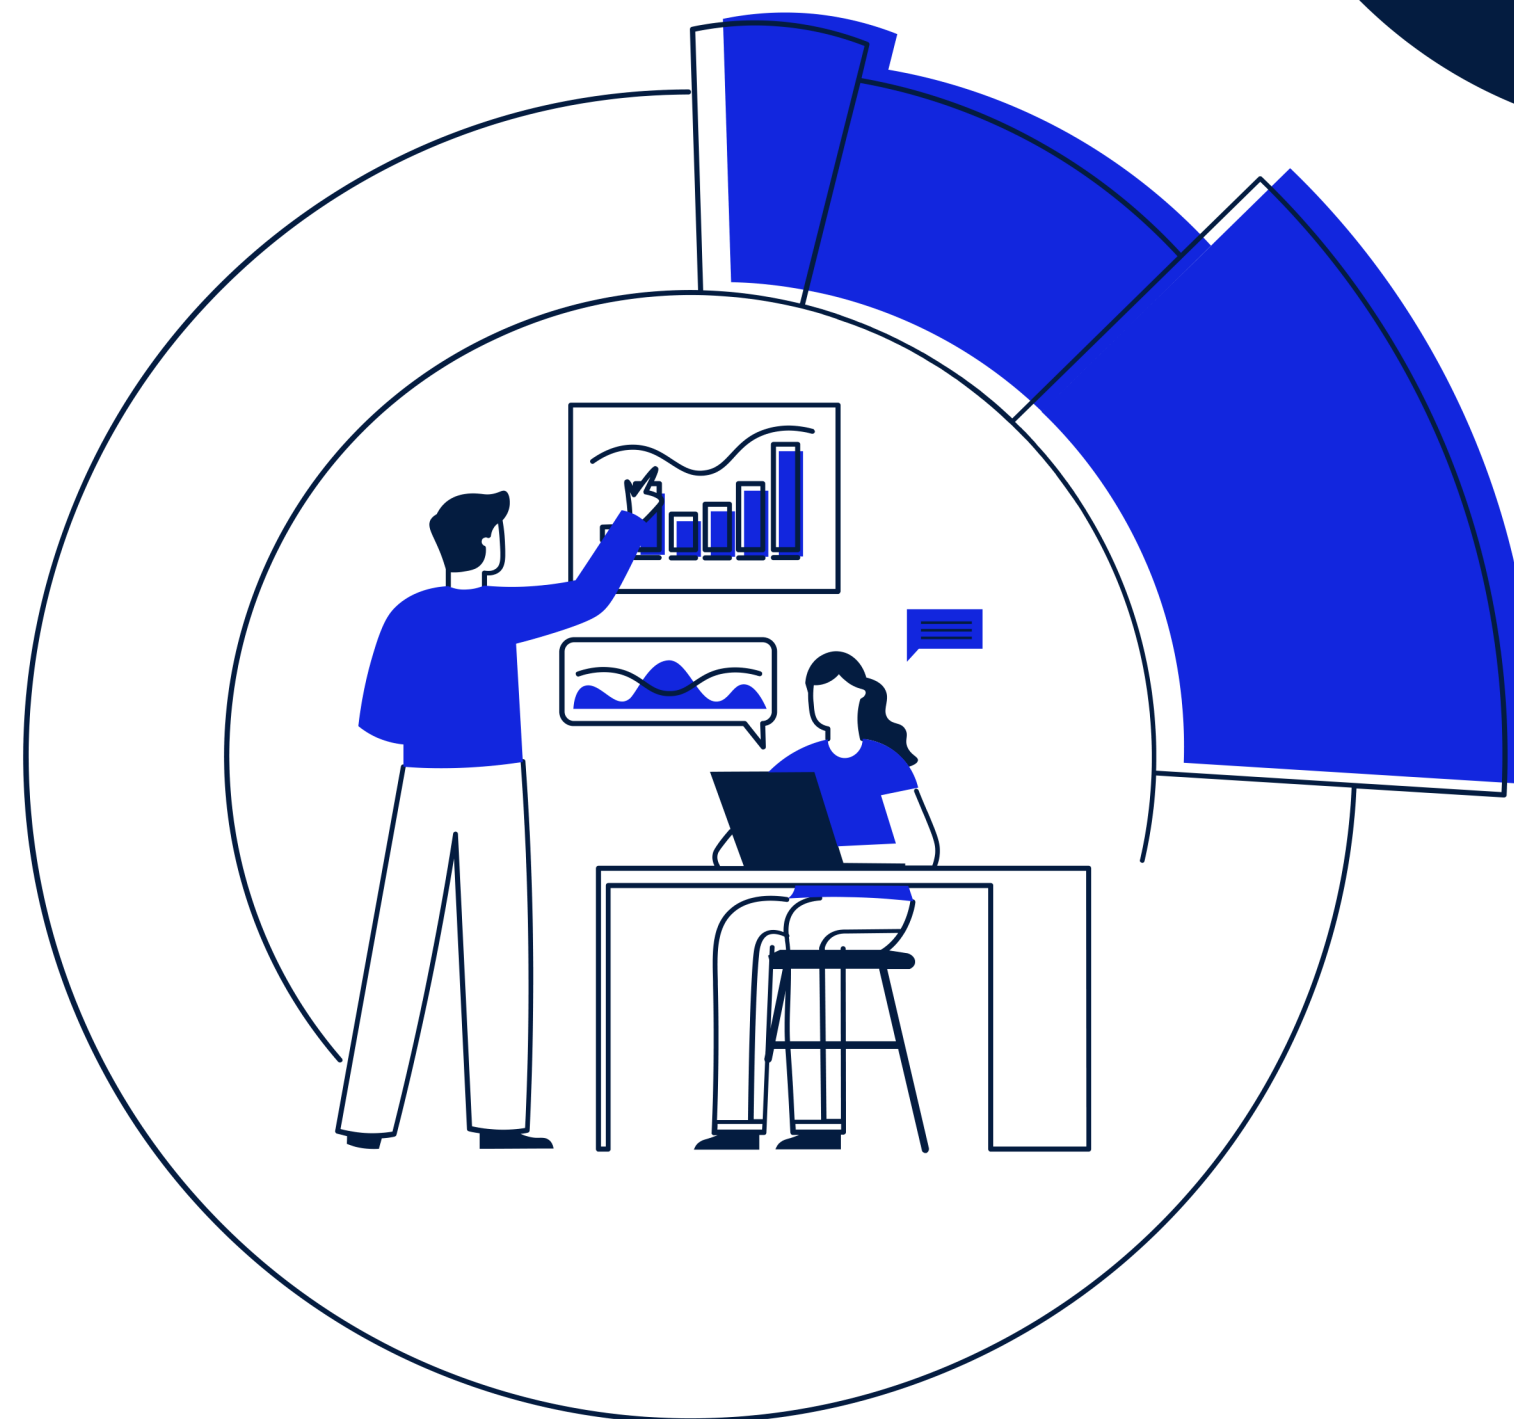

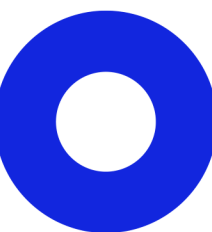

\$109T global stock market cap in 2023

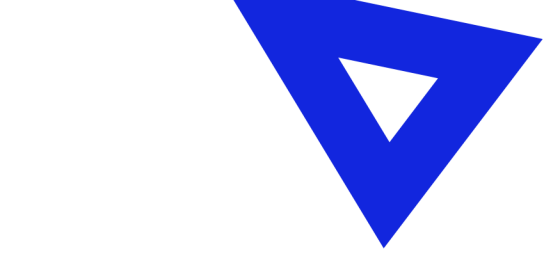

**Global financial market participants (TAM)**

**~27,000 Hedge funds (SAM)**
