

ConnectED

Empowering All Through
Information

PROBLEM

1. In Nigeria the information communication system is fragmented and often fails to reach the most vulnerable populations.
2. Lack of reliable internet access.
3. Low literacy rates make it difficult to disseminate important information to the general public. This can lead to missed opportunities, misinformation, and poor decision-making.

Solution

Creating a centralized digital hub for various organizations and SMEs to upload important updates and information, and send to populations especially those in remote areas via SMS.

Putting the world's
knowledge at
everyone's fingertips

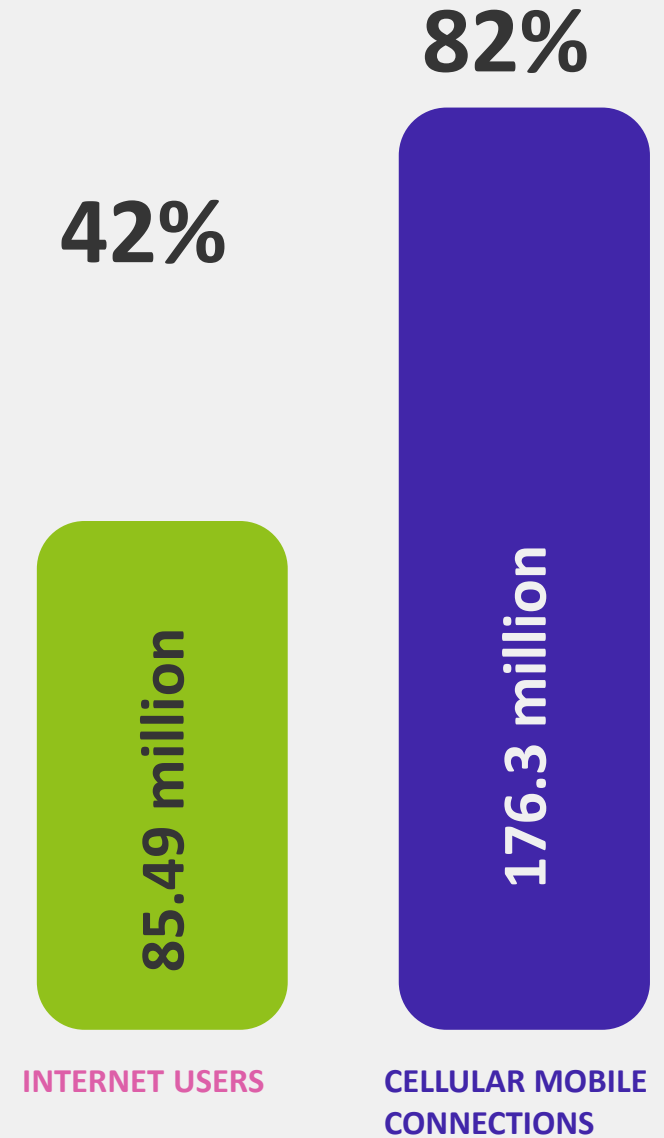

Key Features

- A dashboard where partners can upload documents and manage information dissemination.
- Selected populations receives timely updates and information from our partners.
- Locals can interact with the updates in local languages.

Market Opportunity

- Nigeria's population was 214.1million.
- There are a lot of lapses in the Nigerian Information Communications System.
