HAVE YOU EVER TRIED TO
GENERATE SEVERAL RELATED
IMAGES WITH AI?

IT'S SO DIFFICULT TO MAINTAIN THE STYLE!!

LET ME DO IT
FOR YOU

Erik ▾

You

create a comic book

Erik

Great, let's start creating a comic book! First, we need to establish our main character. Can you describe the main character for me? Think about their appearance, personality, and any specific traits you'd like them to have.

You

Cris is an 8 yo girl. She is smart, loves to study and get good grades. Wears big glasses. Long straight hair. Needs to be in control

You

You choose

Erik

Alright, I'll create a main character for our comic book:

- **Main Character: Max**

- Age: 15 years old
- Gender: Male
- Hair Style and Color: Short, messy dark brown hair
- Race: Caucasian
- Complexion: Fair
- Clothing: Red hoodie, blue jeans, white sneakers
- Accessories: Black wristwatch, small backpack

Does this character description work for you? If you want any changes or additional details, feel free to let me know!

Erik

Great choice! Here's the descriptive card for our first scene:

- **Scene: Sunny Spring Day**

- Setting: Suburban neighborhood
- Key Features: Tree-lined streets with blooming flowers, well-maintained lawns, a few cars parked on the street
- Max's Action: Riding a bike, looking cheerful
- Time of Day: Mid-morning
- Light and Palette: Bright and clear, with vibrant greens from the trees and grass, colorful flowers, and a clear blue sky
- Additional Details: A few birds in the sky, some children playing in the background

Now, I'll create this image in a "Ligne claire" style, which is a flat Franco-Belgian comics style, with uniform, flat, desaturated colors, muted earth tones, simplistic and minimal characters with cartoonish big heads, detailed backgrounds, streamlined flat forms, uniform lighting, and elegant simplicity.

Try it yourself!
