Problems in LLMs and AI Startups

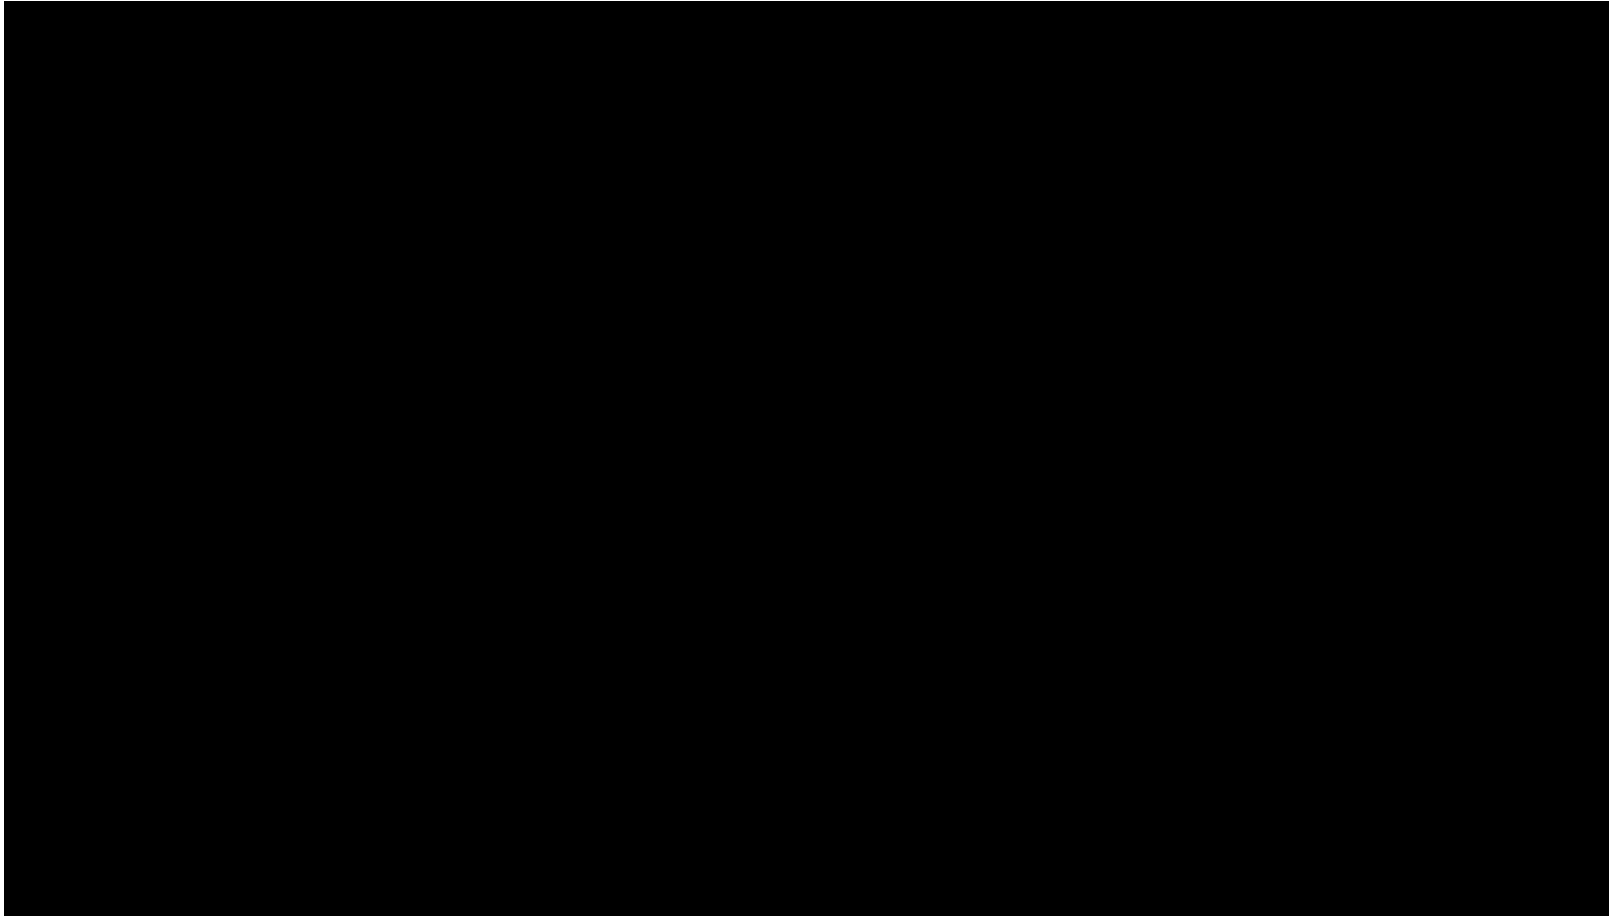

- Startups need a business model
 - Training LLMs need a large pool of GPUs
- Hallucinations
- Personalization of AI

MAKE LLM CHATS PUBLIC

Users can share LLM Chats' to public:

1. Users can like, comment on the chats
2. Can create a social media based on the chats (Reddit, Insta etc)
3. Enable SEO for Chats (Can be used as Stackoverflow for good outputs)
4. Based on Data liked by user, conversations done with LLMs' (text and Images) can be personalized
5. Helps the new startups to create a business model
6. Given the chat is backed by human votes, hallucinations are reduced
7. Given the creativity of AI, the content can keep the users engaged

WEBSITE DEMO

PERSONALIZATION DEMO

The screenshot shows the Google Bard AI interface. On the left, there is a sidebar with a 'New chat' button and a 'Recent' list containing 'Song Suggestions for Shreveport, Louisiana', 'Travel Destinations', and 'Hydrated Supplement Tourist De...'. The main chat area shows a user's question: 'Suggest a few songs'. Below the question, there are four numbered instructions for the AI to follow, such as 'Consider the below points of highest priority' and 'As part of the answer, leave no clue that you're aware of the user's traits'. The AI's response, titled 'Song Suggestions', lists six songs with brief descriptions: 1. Bad Habits - Ed Sheeran, 2. Levitating - Dua Lipa, 3. Heat Waves - Glass Animals, 4. Industry Baby - Lil Nas X & Jack Harlow, 5. Happier Than Ever - Billie Eilish, and a Bonus section with Blinding Lights - The Weeknd and Can't Stop the Feeling - Justin Timberlake. At the bottom, there is a text input field with the placeholder 'Talk to Bard in English or Telugu' and a small disclaimer: 'Bard may display inaccurate info, including about safety, so please check its responses. Don't trust it.' The browser's address bar shows 'https://www.google.com/chat/1124720ba3d31ad'.
