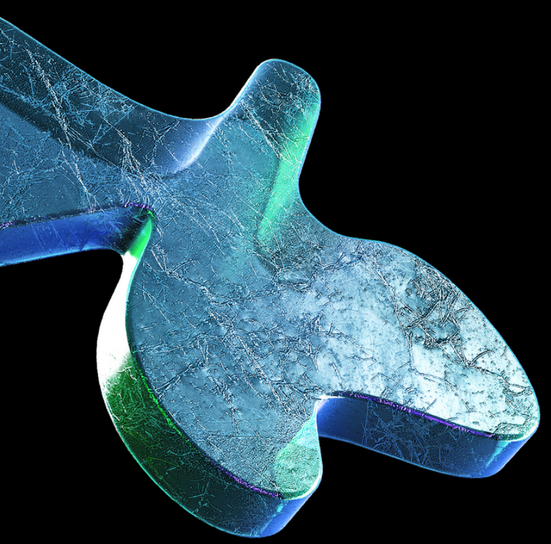
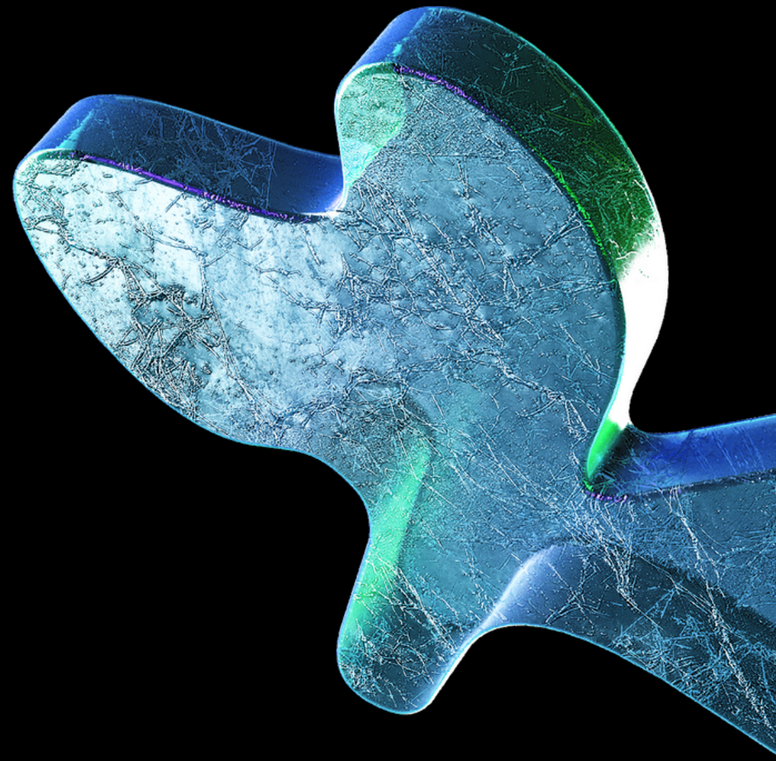
HOW
WE DID IT





Technologies used

VERTEX AI

Utilized for training machine learning models powering CV evaluation and job description matching.

trulens

Analyzes user behavior and engagement within the platform for optimizing the user experience.

PALM 2

Enhances natural language processing capabilities for tasks like job description analysis and tailored CV generation.

CHAT BISON

Serves as the foundational technology for the chatbot, providing personalized guidance and assistance to users.

Integrated into the chatbot for context-aware conversations, CV assistance, and interview preparation guidance based on user interactions.

JobEase.ai Target Customers

JOB SEEKERS

Individuals seeking a user-friendly platform that streamlines the creation of tailored resumes, offers interview preparation guidance, and matches skills to job requirements efficiently.

STUDENTS AND RECENT GRADUATES

Aspiring professionals in need of a tool that assists in crafting impactful resumes based on academic achievements, offers career guidance, and aids in transitioning from academia to the job market seamlessly.

EMPLOYERS

Companies and recruiters utilizing JobEase.ai to expedite candidate evaluation, leveraging automated resume screening, and accessing a diverse pool of qualified applicants that closely match job descriptions.
