Gemini Lens
App for Visual Accessibility

Louis JZ

Flutter app powered by Gemini-Pro-Vision

Revolutionizing Visual Accessibility

Problem

285 million people are visually impaired; navigating the physical world is challenging.

Market Gap

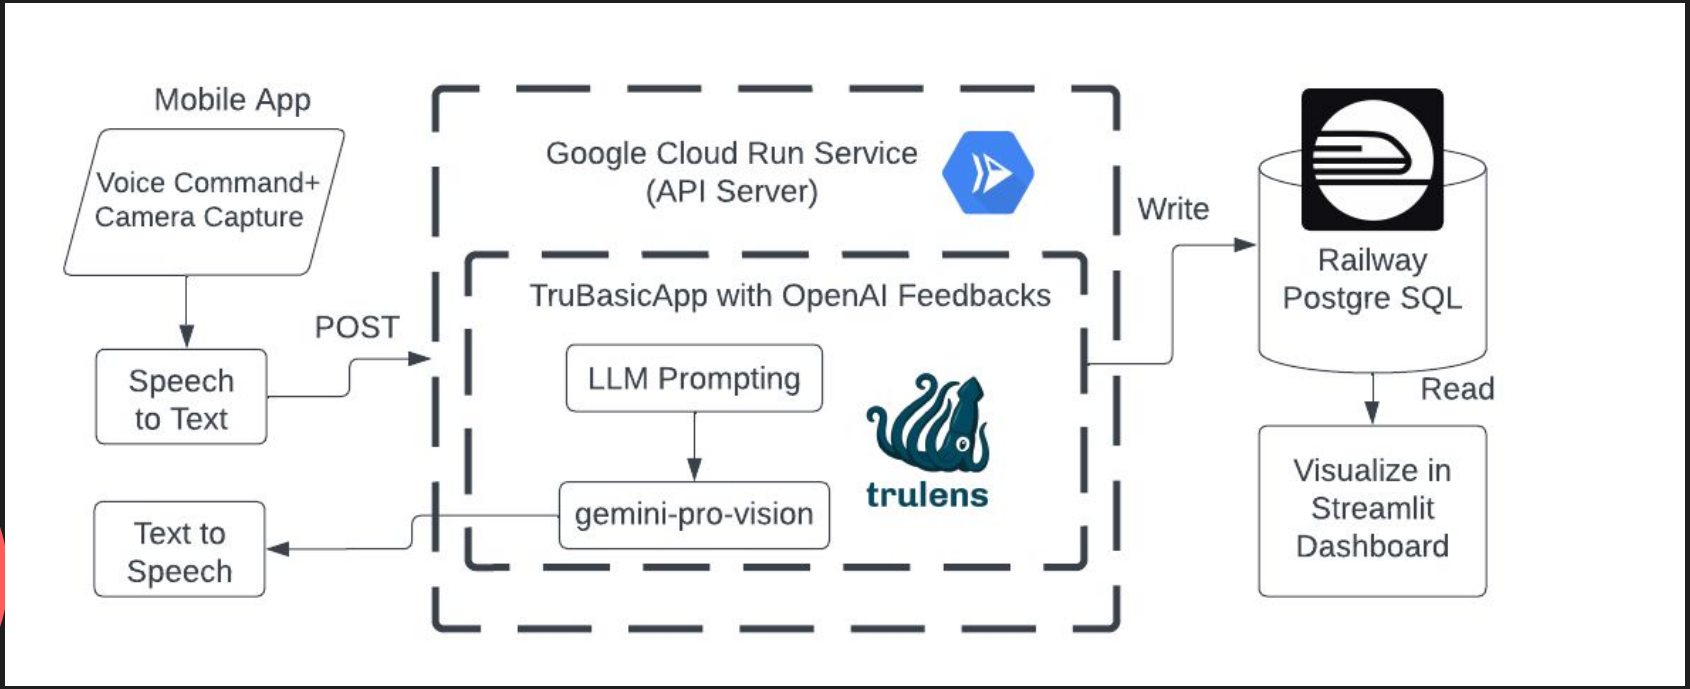
High costs and complexity of existing assistive tech.

Solution

Utilizing Gemini AI to empower the visually impaired by means of Mobile App Accessibility, with continuous LLM evaluation by Trulens. This app directly aligns with UN SDG: Goal 3 - "Good Health and Well-being," and Goal 10 - "Reduced Inequalities."

App Demonstration

Gemini Lens Pipeline



Records	Average Latency (Seconds)	Total Cost (USD)	Total Tokens	conciseness	relevance
13	7.62	$0	0	0.88 high	0.88 high

Future Development of Gemini Lens

Mobile App → Smart Glasses

Future Prospects

Gemini

Gemini Nano

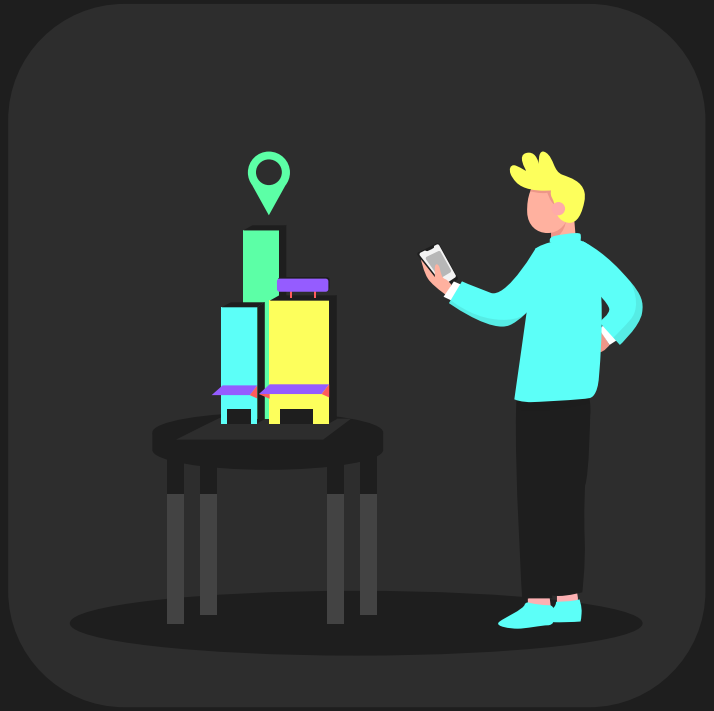
Utilize this model to run offline and allow access in remote areas.

Live Feedback

Continuous camera monitoring to alert users of danger ahead

Integrations

Google Workspace, Facial Recognition, Navigation



Thank You!
