HOW

## The Process

1. User begins the game with Gemini AI
2. Chat message is passed to Gemini Dungeon App that then calls LangChain
3. LangChain creates a conversation with Gemini AI and uses FAISS for chat memory (VertexAI for embedding)
4. AI generates a response and also an image prompt
5. Image prompt is sent to Stability AI to generate scenes for user with Stable Diffusion XL 1.0
6. Image and AI response are sent to the user
