The problem

High Cost of Personal Training

Financial Accessibility:
The financial barrier to personal training services limits access to expert guidance for individuals across various economic backgrounds.

One-Size-Fits-All Approach

Personalization Deficiency:
The drawbacks of generic fitness plans that fail to cater to the diverse and unique needs of individuals.

Safety Concerns

Risk Factors:
The potential risks and safety concerns associated with unsupervised or improperly guided fitness activities, emphasizing the importance of expert oversight.

The solution

Advanced Image Recognition

Users can customize their fitness journey with a simple photo scan. This technology analyzes physical indicators, such as body composition, posture, and unique anatomical features.

Customized Workouts and Diet

Tailored guidance with a thorough understanding of user's fitness goals, current capabilities, and preferences. These plans are not only tailored, but also adapt dynamically as fitness levels progress.

Exercise Analysis

A groundbreaking feature that takes your workout experience to the next level. With this innovative tool, users can now record themselves performing exercises and receive instant, personalized feedback.

Business model

Simple and affordable subscription plans

Free
\$0

- ✓ Limited training and diet plans
- ✓ Limited body analysis
- ✓ Trial period for exercise analysis

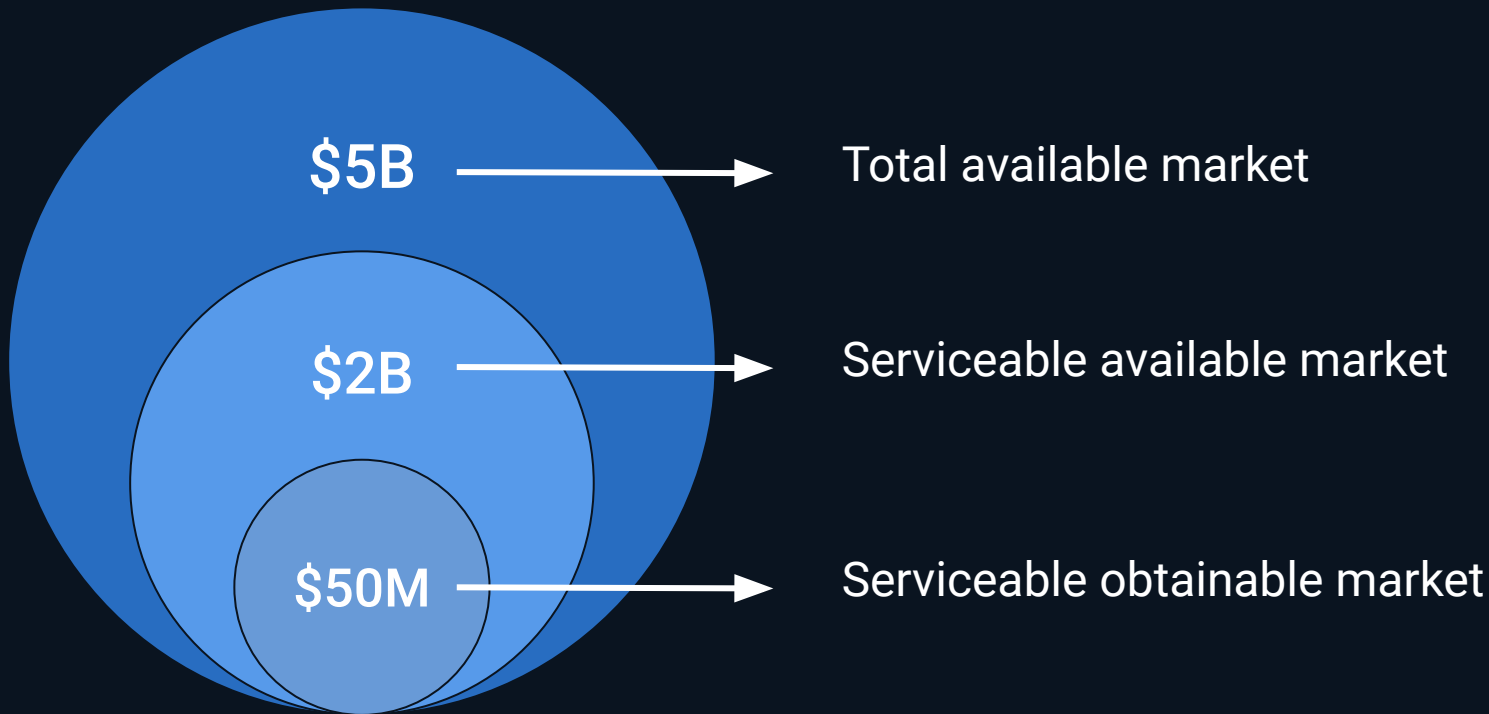

Pro
\$15

- ✓ Unlimited training and diet plans
- ✓ Unlimited body analysis
- ✓ Limited exercise analysis

Premium
\$50

- ✓ Unlimited training and diet plans
- ✓ Unlimited body analysis
- ✓ Unlimited exercise analysis

In establishing a robust revenue stream, our focus lies in diversification and sustainability. By offering premium subscription plans, personalized coaching services, and strategic partnerships with affiliate companies, we aim to create a resilient income flow. This multifaceted approach not only ensures financial stability but also provides added value to our users, fostering a mutually beneficial ecosystem.

Next steps

Integrating the application with widely-used fitness smart bands, watches, and smart scales to ensure precise measurements.

Possibility for users to conveniently order meals from affiliated catering companies, including options like box meal catering.

Generating automatic shopping lists aligned with their diet plans, with the added convenience of online purchasing from partner stores.

Tailored supplementation advice to enhance their fitness journey, with the added convenience of online purchasing from partner stores.

Incorporating a program to enhance the intensity of training progression.

The incorporation of AI allows for real-time monitoring of exercise correctness through phone camera scans.

The end

Thank you!
