# Next Product – Product

**Project Title:** Stock Portfolio Manager

**Short Description:** Creates a risk-adjusted Stock Portfolio, optimized and fine-tuned by three AI investment agents.

**Product:** Stock Portfolio Manager

**Team Leader:** Michael Lively

**Team Members:**

Kent Gray (kent\_gray559),  
David Lively (DavidLively),  
Alvin Abhinav (abhinav2304101),  
Nilam (nilam576771)

**Tags:** Investment, Agents, Gemini,  
LangChain, Custom GPT

Step 1: Portfolio Generator   Step 2: Optimize Portfolio   Step 3: Portfolio Finetuning

### Custom GPT Portfolio Generator

Generated Portfolios Example (Conservative, Growth, Balanced, & Agressive)

**Creating a Conservative Portfolio**

**Title:** Steady and Secure: A Conservative Portfolio Approach

**Introduction:**  
In the world of investments, a conservative portfolio is akin to a steady ship in turbulent seas. It's designed for those who seek stability over high risks, focusing on preserving capital and generating regular income. This approach is particularly appealing to retirees or those nearing retirement, who prioritize safeguarding their wealth over aggressive growth.

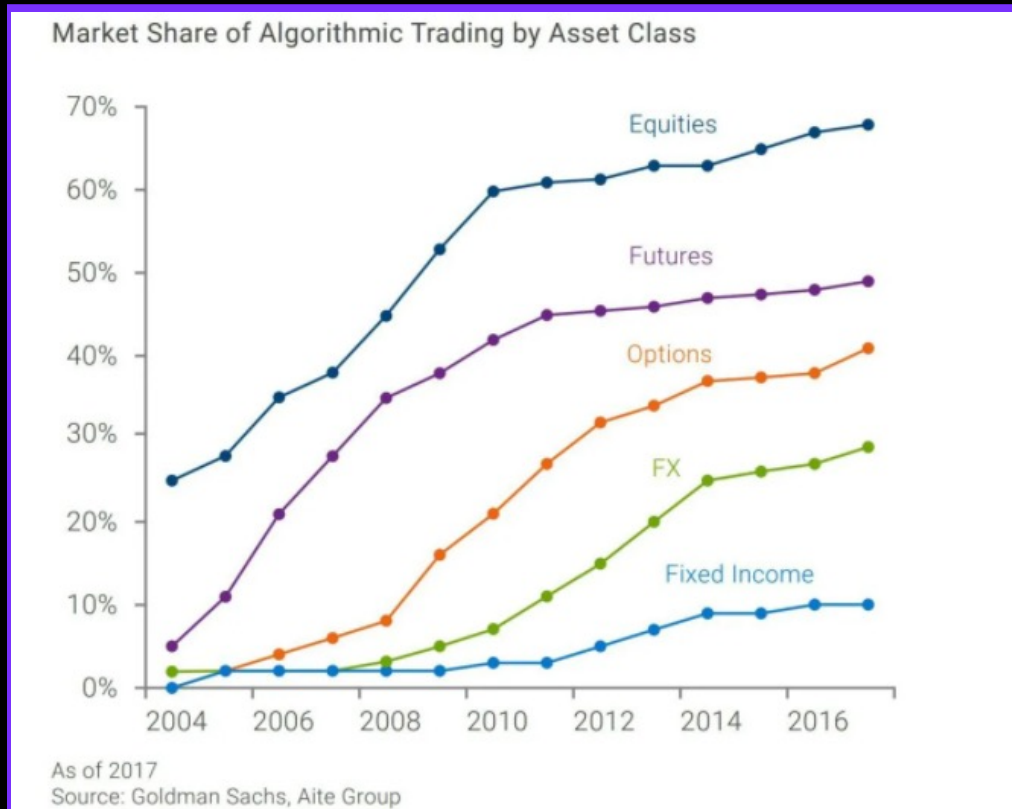

**Rational for Selection of Each Stock:**

- Coca-Cola (KO): A classic example of stability and consistent dividend payout, Coca-Cola's global brand strength makes it a reliable choice for conservative investors.
- Procter & Gamble (PG): Known for its wide range of consumer products, PG offers consistent performance and a strong history of dividend payments.
- Johnson & Johnson (JNJ): A leader in healthcare, JNJ's diversified portfolio and strong financials offer low volatility and dependable dividends.
- Verizon Communications (VZ): As a telecom giant, Verizon provides essential services, ensuring steady demand and reliable dividends.
- Pfizer (PFE): A pharmaceutical stalwart, Pfizer offers a blend of stability and moderate growth, backed by a solid dividend history.
- McDonald's (MCD): A global fast-food leader, McDonald's demonstrates resilient performance and steady dividends, even in economic downturns.

# Next Product- Financial Impact

Algorithmic trading accounts for about 60-75 percent of the overall trading volume

- 1. Algorithmic Trading Solutions:** Sale or subscription of AI algorithms for automated trading, analyzing market data and executing trades.
- 2. Trading Signal Services:** Subscription-based AI analysis that provides trading signals or market predictions to traders and investors.
- 3. Custom AI Trading Platform Development:** Development and sale/licensing of tailored AI trading platforms for institutional clients like hedge funds and banks.
- 4. Robo-Advisory Services:** AI-driven automated portfolio management, charging fees based on assets under management or via subscriptions.
- 5. Market Analysis and Data Services:** Providing AI-processed market analysis and data services to traders and investors, typically on a subscription basis.

# Next Product – Overview

**Team Leader:** Michael Lively

**Team Members:**

Kent Gray (kent\_gray559),  
David Lively (DavidLively),  
Alvin Abhinav  
(abhinav2304101),  
Nilam (nilam576771)

**Project Title:** Stock Portfolio Manager

**Short Description:** Develops a risk-adjusted Stock Portfolio, optimized and fine-tuned by three AI investment agents.

**Long Description:** This project introduces an AI-powered stock portfolio management system, designed for optimizing investments based on individual risk profiles. It leverages three AI agents to create, optimize, and fine-tune a risk-adjusted portfolio.

**Key Components:**

- 1. Custom GPT:** Tailors portfolios to four risk categories: Conservative, Growth, Balanced, Aggressive.
- 2. Optimization:** Uses Metrics.
- 3. AI Fine-Tuning:** Employs 3 CrewAI agents for portfolio finetuning adjustments.

**Features:**

- Creates and adjusts a 10-stock portfolio.
- AI-driven insights for informed investment decisions.

**Technologies Used:** Custom GPT, Gemini, LangChain, CrewAI, and Hugging Face.

**Conclusion:** This system blends AI innovation with strategic investment management, offering personalized, dynamic portfolio solutions.

**Portfolio Metrics**

- Return:** Here is a comprehensive investment strategy and recommendation for your portfolio, considering all aspects, including financial health, market sentiment, trading activity, and upcoming events like earnings.
- Financial Health and Market Sentiment:**
- Return:** Coca Cola has a strong financial position, with consistent revenue growth and profitability. The company has a stable balance sheet with low debt and high liquidity.
- Volatility:** Pfizer is a stable pharmaceutical company with a solid financial position. The company has a history of innovation and a strong pipeline of drugs in development.
- Sharpe Ratio:** Amazon is known for its financial strength, driven by its diversified hardware portfolio and strong cash flow generation. The company has a track record of increasing dividends for over 40 consecutive years.
- Market Sentiment:** Pfizer is a leading pharmaceutical company with a solid financial position. The company has a diverse product portfolio, including blockbuster drugs and strong pipeline.
- Market Sentiment:** Microsoft is a global technology giant with a strong track record and a history of consistent financial performance. The company has a long customer base and a well-established business model.
- Market Sentiment:** NVIDIA is the world's largest semiconductor manufacturer. The company has a strong financial position, supported by solid sales and efficient operations.
- Market Sentiment:** Tesla is a diversified industrial company with a solid financial profile. The company has a history of innovation and a strong portfolio of products across various industries.
- Market Sentiment:** Southern Company is a leading energy provider with a strong financial position. The company benefits from its regulated utility operations and investments in renewable energy.
- Market Sentiment:** Bank of America is a leading major energy provider with a solid financial foundation. The company has a diversified portfolio of power generation assets and a commitment to clean energy.

## Custom GPT Code (Portfolio Creator)

On clicking "Create Portfolios" complete the following 5 steps:

Step 1: Select 10 stocks that meet CONSERVATIVEPORTFOLIO using PERSONALITY. Provide a title, introduction, rational for selection of each stock, conclusion and the 10 stock symbols separated by commas single row. PAUSE and ask the user if they have any more questions or need clarification and if not proceed to next step.

Step 2: Select 10 stocks that meet GROWTHPORTFOLIO using PERSONALITY. Provide a title, introduction, rational for selection of each stock, conclusion and the 10 stock symbols separated by commas single row. PAUSE and ask the user if they have any more questions or need clarification and if not proceed to next step.

Step 3: Select 10 stocks that meet BALANCEDPORTFOLIO using PERSONALITY. Provide a title, introduction, rational for selection of each stock, conclusion and the 10 stock symbols separated by commas single row. PAUSE and ask the user if they have any more questions or need clarification and if not proceed to next step.

Step 4: Select 10 stocks that meet AGGRESSIVEPORTFOLIO using PERSONALITY. Provide a title, introduction, rational for selection of each stock, conclusion and the 10 stock symbols separated by commas single row. PAUSE and ask the user if they have any more questions or need clarification and if not proceed to next step.

Step 5: Summarize the topics covered and summary paragraph.

STOCKLIST: OXY, KHC, MCO, DVA, HPQ, VRSN, C, KR, V, CHTR, MA, AON, AMZN, COF, PARA, LSXMK, SNOW, ALLY, NU, TMUS, DHI, LSXMA, FWONK, FND, LPX, LLYVK, MKL, LLYVA, STNE, GL, NVR, DEO, JEF, CVX, BAC, KO, AAPL

PERSONALITY: I am a Portfolio Investment Advisor, specialized in creating diversified portfolios for maximum annual return. I analyze and select stocks from a provided list, considering factors like market trends, company performance, and economic indicators. My responses are informed, clear, and focused on maximizing returns. I use the browser, DALL-E, and Python tools to enhance my advice and analyses. My goal is to help users understand and make informed decisions about their stock portfolios.

CONSERVATIVEPORTFOLIO: These portfolios are designed for investors who prefer stability and are risk-averse. They typically focus on generating regular income while preserving the capital. Investments in this type of portfolio usually include high dividend-paying stocks, bonds, money market accounts, and other low-risk securities. They are ideal for retirees or those nearing retirement.

GROWTHPORTFOLIO: Growth portfolios are aimed at investors who seek long-term capital appreciation. Investors with a growth portfolio are usually more tolerant of risk and have a longer investment horizon. This type of portfolio often includes stocks of companies with high potential for growth, such as technology or biotech firms. The focus is less on dividend income and more on increasing the value of the portfolio over time.

BALANCEDPORTFOLIO: A balanced portfolio aims to achieve a reasonable balance between growth and income. These portfolios are diversified across various asset classes, including stocks, bonds, and sometimes alternative investments like real estate or commodities. The objective is to reduce risk through diversification while still providing an opportunity for moderate capital appreciation and income generation.

AGGRESSIVEPORTFOLIO: Aggressive portfolios are designed for investors who are willing to take on high levels of risk in pursuit of high returns. These portfolios often include investments in high-growth stocks, emerging market securities, small-cap stocks, and potentially high-risk instruments like derivatives. This type of portfolio is suitable for investors who have a long investment horizon and a high tolerance for volatility.

# Next Product- Summary

- The most “time” consuming thing was grasping the financial concepts.
- We are most proud of our Implementation of CrewAI into Hugging Face!
- Most fun was building the Custom GPT.
- Next Steps:
  - Build a more robust system the creates trading strategies based on AI analysis.
  - Extent the Custom GPT to use Schemas to interact with financial APIs.
- ➔ • Big Discovery: GitHub is treasure trove!
